

HOUSEHOLD HAZARDOUS WASTE AND YOUR DRINKING WATER

What Is Household Hazardous Waste? Chemicals typically found in homes, such as: Gasoline • Antifreeze • Oil-Based Paints • Drain Cleaners • Pesticides • Furniture Strippers • Oven Cleaners • Disinfectants • Kerosene • Spot Removers • Used Motor Oil • Auto Batteries

Why Should You Be Concerned? Some household hazardous wastes can injure you, your family, or your pets; damage the environment; or contaminate drinking water supplies. The groundwater in your area flows to a public drinking water supply, and we're asking for your help in keeping it clean and safe. If you have a well on your property, you also need to think about keeping the groundwater that supplies *your* well clean and safe to drink.

What Should You Do? *Bring your household hazardous waste to one of your community's household hazardous waste collection events* this summer or fall.*

For information about your area's collection events, contact:

Keene Recycling Center

603-352-6550

<https://ci.keene.nh.us/public-works/household-hazardous-waste-schedule>

Participating Communities: *Chesterfield, Dublin, Fitzwilliam, Greenfield, Hancock, Harrisville, Hinsdale, Keene, Marlborough, Marlow, Nelson, New Ipswich, Peterborough, Richmond, Stoddard, Swanzey, and Walpole*

There are limits on what you can bring and how much so be sure to check out the website above for more information, including dates, times, and locations of collection events. Scan the box above to immediately reach your town's website!

For more information about Household Hazardous Waste Collection (HHW) call DES at 271-2047 or visit our household hazardous waste website at: <https://www.des.nh.gov/waste/household-hazardous-waste>

* Funding assistance provided by NH Department of Environmental Services.
