NON PUBLIC SESSION

ADJOURNMENT

CITY OF KEENE NEW HAMPSHIRE

ITEM #A.1.

Meeting Date: September 24, 2026

To: Finance, Organization and Personnel Committee

From: Carrah Fisk-Hennessey, Parks and Recreation Director
Bryan Ruoff, City Engineer

Through: Elizabeth Ferland, City Manager
Donald Lussier, Public Works Director

Subject: **Monadnock View Cemetery Expansion Project Funding Allocation - Parks and Recreation Director**

Recommendation:

Move to recommend that the City Manager be authorized to do all things necessary to amend the fiscal year allocated budget for the Cemetery Expansions and Improvements Program Account (65J0028A) in FY27 to \$1.4 million in order for the City to bid, award and construct the complete scope of the Monadnock View Cemetery Expansion Project in lieu of the yearly phased allocations, as described, budgeted and approved in the current CIP.

Attachments:

1. 2026_09_16_Cemetery Trustees Meeting Minutes

Background:

The Engineering Division, in collaboration with the Parks & Recreation Department, developed conceptual-level plans, submitted the project for the necessary permits, and prepared final plans and contract specifications for bidding and construction of the Monadnock View Cemetery Expansion Project.

As currently proposed, the project will develop approximately 9.42 acres of undeveloped cemetery property within Monadnock View Cemetery. Improvements will include paved access roads, drainage infrastructure, dedicated hose bibs within each developed zone, landscaping, fence gates, a dedicated water meter and backflow preventer, and approximately 6,000 additional grave sites. Future development is also anticipated to include approximately 900 columbarium spaces.

The project was originally included in the Capital Improvement Program (CIP) and approved by the City Council as a phased project. Under the original plan, construction was expected to occur over approximately seven to eight years, with an estimated expenditure of \$150,000 per year. Following further evaluation, however, it was determined that completing the improvements in phases would likely increase the total project cost by approximately 30% to 50% due to inflation, mobilization, and

other costs associated with extending construction over multiple years.

In response to these anticipated cost increases, the Parks and Recreation Director and City Engineer met with the Cemetery Board of Trustees to discuss an alternative approach. The Board authorized the City to proceed with bidding the full scope of the proposed improvements, up to the engineers' estimated construction cost of \$1.4 million. The meeting minutes documenting this authorization are included as an attachment.

The project is anticipated to be advertised for bidding in September or October, with bid opening scheduled for mid-October. Following receipt of the bids, the Parks & Recreation Department and Engineering Division will review the proposals and prepare a recommendation for award to the selected contractor. The recommended award will be presented to the Cemetery Committee for authorization before a construction agreement is executed.

Construction is anticipated to take approximately one year. The City will bid, administer, manage, and inspect the project throughout construction. Contractor payment requisitions will be submitted to the City for review and verification. Once the City confirms the work completed and the amounts due, it will process payments to the contractor. The Cemetery Trustees will reimburse the City for eligible payments made on the project's behalf.

City of Keene
NEW HAMPSHIRE

TRUSTEES OF TRUST FUNDS
MEETING MINUTES

Wednesday, September 16, 2026 9:30 AM City Hall-2nd Floor Conference Room

Members Present:

Allen Mendelson
Michelle Howard
Martha Curtis
Janelle Sartorio
Heather Scheck, Alternate

Staff Present:

Sherry Miller, Senior Staff Accountant

Absent:

Andrew Royce

Chair Mendelson called the meeting to order at 9:30 AM with Trustees, Howard, Curtis and Sartorio present. Alternate Scheck arrived at 9:35.

Ben Nugent – Use of Benevolent Fund

Ben Nugent and Luke Antin met with the Trustees to discuss purchasing three pieces of gym equipment totaling \$24,125.88 for the Police Departments gym using the Benevolent Fund.

Trustee Curtis made a motion to approve the use of funds. Trustee Howard seconded. Motion carried unanimously.

The Trustees unanimously agreed to move the meeting with Deputy City Attorney, Brandon Lathem up from 10:00 to 9:45 a.m.

Deputy City Attorney, Brandon Lathem – Renouf Fund (Fire) CY Pres Update

Deputy City Attorney, Lathem met with the Trustees to update them on the Renouf Fund CY Pres. The petition is complete and has been submitted to the Charitable Trust, which will take about a month for them to approve. Once they approve it, he will petition the court.

Brandon updated the Trustees on the Maria A Giffin Fund, Serena W. Upton Fund, Mary R. Hall Charitable Fund and the Clement J. Woodward Fund for which the Trustees had questions from a previous meeting. Brandon stressed that Trustees have the authority to interpret the original intent of Trusts. If the Trustees can identify the primary intent, they can move forward utilizing within that intent. If they cannot, then they would need to petition the court. Brandon presented several court cases and assured the Trustees that they would be backed up by City Counsel with their decision, further stating that if they do have questions about how to utilize, have staff reach out to him or City Attorney Palmeira for further guidance. Trustee Curtis asked if current Trustees made an interpretation, would they be setting a precedent if future Trustees interpreted

it differently. Brandon encouraged them to be consistent and set guidelines. The Trustees agreed to review the above Human Service Trusts at their next meeting.

Approval of Minutes

Trustee Howard made a motion to approve the minutes of the August 19, 2026, meeting as presented, Trustee Curtis seconded. Motion carried unanimously.

COMMON TRUST FUNDS

RECEIPTS

968/974 Cemetery Lot Sales

Chair Mendelson presented \$12,000 for receipts for cemetery lot sales received through June 30, 2026: with \$6,000 for #968 Cemetery Trust A – Perpetual Care of Cemeteries, and \$6,000 for #974 Cemetery Trust Fund B – Cemetery Capital Reserves.

Trustee Curtis made a motion to approve the receipts as presented. Trustee Howard seconded. Motion carried unanimously.

APPROVAL FOR USE OF FUNDS –

#974 Cemetery Trust B

Chair Mendelson presented a request for use of funds totaling \$11,250 to reimburse the City of Keene for payment made to Treasurer, State of NH. Supporting documents were included for the Trustees review.

Trustee Curtis made a motion to approve the request as presented. Trustee Howard seconded. Motion carried unanimously.

CAPITAL RESERVES

DISBURSEMENTS

Chair Mendelson presented disbursements totaling \$564,593.82 noting that the funds are reimbursing the City of Keene for the period through August 31, 2026. Supporting documentation was presented for the Trustees review.

- #802 Fire Equipment = \$13,503.12
- #810 Downtown Infrastructure = \$29,172.29
- #818 Reappraisal = \$22,074.30
- #832 Wastewater Treatment Plant = \$43,652.49
- #834 Sewer Infrastructure = \$98,721.78
- #840 Water Treatment Plant = \$43,999.69
- #842 Water Infrastructure = \$34,684.27
- #850 City Hall Parking Deck = \$70,358.27
- #860 Fleet Equipment = \$208,427.61

Trustee Curtis made a motion to approve the disbursements of funds as presented. Trustee Howard seconded. Motion carried unanimously.

DISTRIBUTION OF MS9S

Chair Mendelson asked if there were any questions on the MS9 reports for the Common Trust and Capital Reserves for the periods ending July 31, 2026, and August 31, 2026. No questions were asked.

The Trustees unanimously agreed to move the meeting with Carrah Fisk-Hennessey and Bryan Ruoff from 10:30 to 10:11.

Monadnock View Cemetery Expansion

Bryan Ruoff presented a map showing what is planned to expand Monadnock View Cemetery. Bryan would like to get approval to bid as one project in lieu of a phased project, as this would be easier to bid, easier for the city to manage and easier to construct. The estimate for the whole project including irrigation is approximately \$1.4 million. Bryan explained the second option of doing the project in two phases but feels that we would get more proposals and possibly better pricing if bid complete. After discussion, the Trustees agreed that the project should be put out to bid whole. Funds would come from Cemetery B Capital Reserves. Carrah felt confident that using this amount of money from the fund would not affect negatively other cemeteries. Bryan stated that once final bids are received he will come back to the Trustees with the final cost of the project.

Trustee Howard made a motion to approve to bid the full project to include irrigation up to \$1.4 million dollars, contingent on FOP approval with the condition to expedite one section for immediate availability. Trustee Sartorio seconded the motion. Motion carried unanimously

The meeting adjourned at 10:49 AM.

Respectfully submitted,
Sherry Miller

CITY OF KEENE NEW HAMPSHIRE

ITEM #A.2.

Meeting Date: September 24, 2026
To: Finance, Organization and Personnel Committee
From: Mike Kopcha, Police Captain
Through: Steve Stewart, Police Chief
Elizabeth Ferland, City Manager
Subject: 2027 Highway Safety Agency Grant - Police Captain

Recommendation:

Move that the Finance, Organization, and Personnel Committee recommend that the City Manager be authorized to do all things necessary to accept and expend the grant from the New Hampshire Highway Safety Agency to fund Highway Safety Grant- Keene.

Attachments:

None

Background:

This program is a statewide initiative sponsored by the NH Highway Safety Agency on an annual basis. In years past this grant was divided and applied for through different sub-projects such as DWI Patrols, Sustained Traffic Enforcement Patrols and Bicycle and Pedestrian Patrols. The NH Highway Safety Agency has combined all these different programs into one complete grant.

The purpose of this grant is to reduce the number of persons driving while intoxicated and related accidents, to combat all of the more prevalent motor vehicle safety infractions, and to reduce the number of persons who are violating pedestrian and bicycle laws in the downtown area.

The campaign runs from October 1, 2026 to September 30, 2027.

Below is the allocation of the Grant money:

Project	Grant Amount
Speed	\$2,000
DUI	\$1,800
Distracted Driving	\$2,000
Pedestrian Bicycle	\$1,000
Mobilizations	\$3,700
Total Grant Amount:	\$10,500

The total cost of this operation, \$10,500, will be reimbursed by the New Hampshire Highway Safety Agency; the reimbursement includes payroll-related deduction.

CITY OF KEENE NEW HAMPSHIRE

ITEM #A.3.

Meeting Date: September 24, 2026

To: Mayor and Keene City Council

From: Megan Fortson, Planner

Through: Mari Brunner, Senior Planner
Paul Andrus, Community Development Director

Subject: In Support of Proposed Amendments to the Keene Community Power Program — Energy & Climate Committee

Council Action:

In City Council September 17, 2026.

Referred to the Finance, Organization and Personnel Committee.

A true record;

Attest:

City Clerk

Recommendation:

A motion by Dr. Koning for the Energy and Climate Committee to support the changes to the Community Power Program was duly seconded by Ms. Maxfield.

The motion for the Energy and Climate Committee to support the changes to the Community Power Program carried unanimously on a roll call vote.

Attachments:

None

Background:

At their meeting on August 26, 2026, the Energy & Climate Committee (ECC) discussed a potential update to the Keene Community Power Program. The update would allow for customers qualifying for the Electric Assistance Program (EAP) to be automatically enrolled in the lowest-cost option offered through the Keene Community Power Program, called Keene Basic. Included below is an excerpt from the draft minutes of this meeting. At the conclusion of their discussion, the ECC voted unanimously to support the changes to the Community Power Plan.

3. Community Power Update – Implementing Keene Basic Default for Low Income Customers

Ms. Fortson explained that Senior Planner Mari Brunner had been speaking with Good Energy about creating a new lower default option for people receiving assistance from Eversource; they would be automatically enrolled into it. That would require the City to create an updated Community Power Plan, which would have to be approved by City Council. She also thought it had to be approved by the New Hampshire Public Utilities Commission. She said this is something that would cross Committee members' desks in the future. She called the automatic enrollment exciting. She was unsure whether it would be people already on Community Power or only those newly enrolled. Ms. Fortson recalled the Allison McNeill from Good Energy mentioning this during the July 22nd ECC meeting and said it was happening a little sooner than she expected but it would be great.

Mr. Pipp noted that Keene Community Power has Keene Basic, Keene 10, Keene Standard, and Keene 100 as options. He asked about the base amount of renewable energy included in each option. Discussion ensued.

Ms. Brunner arrived at 4:49 PM.

Ms. Brunner said this would be for anybody who is on the New Hampshire Electric Assistance Program (EAP). The City had already confirmed with Direct Energy that they have the data they need to auto-enroll those customers into the basic option. Moving forward, when there is a sweep or new pricing rollout, those customers would be automatically enrolled in the lowest cost option unless they opt for a different option or want to opt out. For right now, anybody that is already elected to go to Keene 100 would stay on that. If they are currently on Keene 50, they will go down to the Basic. If they had chosen Keene 10, they would stay on Keene 10. Ms. Brunner had posted the plan on KeeneCommunityPower.com. Changes to the plan are on pages five and six under the "Equitable Treatment" section, which would be modified to state that the City would be distinguishing between customers that participate in the EAP and others. Other changes proposed to the plan include, instead of specifying a specific company as the community power consultant, just saying "community power consultants." The other change proposed is under the "Historical Overview" section to include changes in liability. Ms. Brunner hoped for a recommendation from the Committee to the City Council on whether the ECC, as the advisory committee for the Community Power Program, supports this change.

A motion by Dr. Koning for the Energy and Climate Committee to support the changes to the Community Power Program was duly seconded by Ms. Maxfield.

Ms. Maxfield asked if the Keene Basic would include 35% renewable. Ms. Brunner said Keene Basic would remain 25% renewable energy as mandated by the state and Keene 10 would remain the option with 35% renewable energy included.

Discussion ensued about whether the consultant had the necessary data to ensure that any new customer enrolled into the Community Power Program that is also part of the EAP would be automatically put into the Keene Basic option. Ms. Brunner was unsure this could be done retroactively for other EAP customers already part of the Community Power Program.

Ms. Brunner said that the current Community Power contract will be in place through 2027 and then they would negotiate new pricing.

Councilor Lake recalled discussions on the Council floor where there had been a lot of debate about

costs, especially related to low-income households. He was trying to balance that against the goal of trying to have 100% renewable energy. He said this change technically fits with the goal of trying to get to 100% renewables, so he was in support of it. He wanted to make sure it would be financially responsible at the same time.

Ms. Maxfield said it would only be 300 people out of 12,000 program participants qualify for the EAP, so the potential impact to the 100% renewable energy goal would be very low.

Chair Leversee said the other big variable there is what the electricity rates are for renewals. So, if rates go down, then all the goals line up. He said we would have to see as the contracts come forward too. Mr. Pipp wondered through Councilor Lake if there would be the possibility for some sort of fund through Eversource or Southwestern Community Services to get assistance paying for a percentage of renewable energy. He said right now it is nine-tenths of a cent to go from basic to 50% renewable; he said the marginal cost is not that big to bump people up. He did not know if there would be a way to tweak the financial support through other resources and community services to help cover that. Ms. Brunner replied that the concept was discussed when this program was originally being developed and a part of the confusion around the naming of the various options is that initially the Keene 100 option was going to be 100% additional renewable energy, so customers who chose that option would actually be choosing to purchase more RECs (renewable energy credits) than needed to cover their energy usage, so that it would offset the customers who cannot afford that. She said that is something they could look at again in the future. She said she would be hesitant to try and change any of those fuel assistance programs because they are so heavily regulated already that adding any other variables into the mix could make it unfeasible to work.

The motion for the Energy and Climate Committee to support the changes to the Community Power Program carried unanimously on a roll call vote.

Ms. Fortson confirmed that Ms. Brunner did not need a letter from the Chair for City Council. Ms. Brunner said she would just need a report from the ECC which she would create from the discussion in the minutes. This would go to City Council on September 17, 2026 and to the Council's Finance, Organization and Personnel (FOP) Committee after that. Members of the Committee were encouraged to come and speak to this item at the FOP Committee meeting on the fourth Thursday of September. Ms. Fortson said she would send out the red-lined version of the Community Power Program's proposed changes via email."

CITY OF KEENE NEW HAMPSHIRE

ITEM #A.4.

Meeting Date: September 24, 2026

To: Mayor and Keene City Council

From: Mari Brunner, Senior Planner

Through: Elizabeth Ferland, City Manager
Paul Andrus, Community Development Director

Subject: **Proposed Amendments to the Keene Community Power Plan - Community Development Department**

Council Action:

In City Council September 17, 2026.

Referred to the Finance, Organization and Personnel Committee.

A true record;

Attest:

City Clerk

Recommendation:

That the proposed amendments to the Keene Community Power Plan be referred to the Finance, Organization and Personnel Committee.

Attachments:

1. 8-7-26 clean draft
2. 8-7-26 redline draft

Background:

[Keene Community Power](#) is a program that provides electricity supply options to Keene residents and businesses on a default ("opt-out") basis. The program was launched in June 2023 and is currently in its second Electric Service Agreement (ESA) contract, effective December 2025 through December 2027. Electric customers in Keene can join or leave the program or switch options at any time. The default product, which is about 2 ¢/kWh cheaper than the current Eversource Default Service, costs 12.100 ¢/kWh and includes 50% renewable energy. The other products offered through the program range in price and renewable energy content from 11.220 ¢/kWh / 25% renewables (Keene Basic), 11.580 ¢/kWh / 35% renewables (Keene 10), to 13.890 ¢/kWh / 100% renewables (Keene 100).

City staff propose amending the existing Community Power Plan and ESA to change the default option for low-income customers. Low-income customers can be identified in utility data as those customers participating in the New Hampshire Electric Assistance Program (EAP), which provides a discount on the entire electricity bill for income-eligible customers. The City proposes to change the default product for customers participating in the EAP to Keene Basic, the least-cost option, rather than the current default product, Keene Standard. Keene Standard will continue to be the default product for all other customers. EAP customers will retain the option to switch to any other Keene Community Power product, if they wish. There are currently just over 300 EAP customers participating in Keene Community Power.

The following table provides a summary of the proposed change:

	Keene Basic	Keene 10	Keene Standard	Keene 100
Renewable Energy	Meets State Minimum (25% in 2026)	Adds 10% NH Class I (35% in 2026)	Adds 25% NH Class I (50% in 2026)	Adds 75% NH Class I (100% in 2026)
Price (Dec. 2025 - Dec. 2027)	11.220 ¢/kWh	11.580 ¢/kWh	12.100 ¢/kWh	13.890 ¢/kWh
EAP Participants	Default	Option	Option	Option
All Other Customers	Option	Option	Default	Option

The proposed amendments to the Plan are limited to the following:

- On pages 5-6, the “*Equitable treatment*” section references that the Program will distinguish between customers that participate in the New Hampshire Electric Assistance Program (EAP) and other customers by assigning a default product to EAP customers and a default product to all other customers. On page 31, the “*Exhibit 1, Historical overview*” includes a new entry documenting this amendment.
- Throughout the Plan, references to specific consulting firms have been replaced with the term “*Community Power Consultant*” to make the language more flexible and reduce the need for future plan amendments when consulting relationships change. The Plan also directs readers to the professional services agreement for additional information regarding the consultant and their responsibilities.
- The timeline of revisions to the plan was moved from the top of the “*Historical overview*” section in Exhibit 1.

If this proposal is approved, existing EAP customers who are enrolled in Keene Standard will be moved to Keene Basic at the next available meter read date, following public announcements from the City. For EAP customers that have affirmatively opted in to Keene 10 or Keene 100, the Program will honor that choice and not make any change to their product. All new eligible EAP customers will be automatically enrolled in Keene Basic unless they choose a different product or opt out of the program.

I. Community Power Goals and Vision

The City of Keene will develop and implement its Community Power Program (“Program”) as described in this Community Power Plan (“Plan”).

Community Power creates new electricity supply choices for Keene residents and businesses with the potential for cost and environmental benefits beyond that of the Default Service supply from the electric distribution utility, Eversource. Instead of simply utilizing Eversource’s electricity supply, Keene will bundle together the electricity needs of its residents and small businesses and put out a bid for an electricity supplier to provide the necessary electricity at competitive prices. With Community Power, the City is able to make strategic decisions about when to solicit bids, lock in fixed pricing for multiple years, and increase the amount of renewable energy above the existing statewide minimum. Eversource will continue to manage billing and maintain wires and poles.

Community Power is part of the City's comprehensive climate and energy planning process. One of the primary goals of Keene's process, embodied in the City Council's 2018 Resolution R 2018-36, is to achieve 100% renewable electricity use:

"It is the goal of the City of Keene that all electricity consumed in the City will come from renewable energy sources by the year 2030 and that 100% of all thermal energy and energy used for transportation come from renewable energy sources by the year 2050. This goal will apply to the entire Keene community, not just municipal government operations."

Keene's climate and energy planning process also seeks to support equity, energy efficiency, job creation, and climate resilience and preparedness.

To establish specific goals and a vision for the Program, the City held information sessions and surveyed community members to ask about their priorities and preferences. While individual opinions differed, there was strong support from the majority of survey respondents from all income classes and age groups for five community priorities related to electricity supply:

- Choice for electricity options
- Control of electricity costs
- Competitive rates and lower bills
- Increased local renewable energy
- Local jobs

Particularly strong among respondents was support for renewable energy. As shown at right, over 90% of all respondents indicated a desire for extra renewables, and almost half indicated a willingness to pay more for extra renewables.

The desire for extra renewable energy generally held across age and household income brackets, with the strongest support overall in the middle income bracket, as shown below.

Do you want extra renewable energy, by household income?

Detailed survey results can be found in **Exhibit I**.

The Keene community goals translate into the following goals for Keene's Community Power Program:

1. Establish a standard (or default) electricity supply product that value via competitive rates, uses more renewable energy, and source local renewable energy as defined in Section V.b.
2. Increase the contribution of renewables toward 100% renewable electricity for the entire Program by 2030, using optional products, tools and incentives that include:
 - Provide optional electricity supply products with alternative renewable electricity amounts (for example, 100%). Options afford individual participants the opportunity to meet higher renewable goals immediately and increase the overall renewable energy impact of the Program;
 - Catalyze the development of distributed energy resources within Keene, such as rooftop solar, by providing enhanced net metering and other incentives;
 - Explore opportunities to support the development of and utilize new renewable energy supply at utility scale within our region;
 - Support electrification, particularly of thermal and transportation sectors;
 - Support energy efficiency initiatives to reduce total Program electricity demand and costs for participants; and
 - Explore, and implement when possible, other tools and incentives successfully established elsewhere in New Hampshire, in other states or around the world (for example, time-of-use rate structures).
3. Engage the community to bring new ideas and resources into the Program, through

every means possible, over the life of the program. Also engage the community to assess how benefits of the Program can be allocated equitably.

4. Work with regulators, utilities and suppliers to craft solutions and remove barriers to harnessing all cost-effective solutions, especially recognizing that increased electrification will be part of the solution toward 100% transportation and thermal renewable energy by 2050.
5. Expand the Program's impact by empowering other communities with similar goals. This includes sharing information and materials to help launch other programs as well as evaluating regional buying groups as to whether they provide greater cost savings to all participants through economies of scale.

The vision for Keene Community Power is to launch a timely Community Power Program that provides community members with attractive choices and substantially enhanced renewable energy options at competitive prices, and opens a new promising community path to 100% renewable electricity in 2030.

Community Power is emerging as a leading strategy to reach multiple community goals efficiently and equitably. The City of Keene looks forward to refining this vision for meeting our 100% renewable energy goals and all of Keene's goals that are impacted by energy choices.

II. Process to Develop and Approve Plan

Before implementation, the Plan must be reviewed and approved by the Community Power Committee ("Committee") and adopted by the Keene City Council. The Committee will ensure that the Program satisfies all of the statutory requirements, including that the Plan provides universal access, reliability and equitable treatment for all classes of customers. This Plan was developed to demonstrate that the Program of the City satisfies all the requirements necessary for approval by the Committee and adoption by the City Council.

This plan was developed through the following process, consistent with New Hampshire Revised Statutes Annotated (RSA) 53-E:

1. Creation of Community Power Committee
2. Creation of a Draft Plan with public hearings,
3. Approval of Plan by Community Power Committee,
4. Adoption of Plan by City Council, and
5. Submission of Final Plan to Public Utilities Commission.

Please see **Exhibit I** for detail on these steps.

III. Customer Participation

III.a. Applicable classes of customers

The Community Power Program will be available for the residential, commercial and industrial classes of electricity customers as defined by City's electric distribution company, Eversource ("Applicable Classes"). See Eversource for current classes: <https://www.eversource.com/content/nh/residential/my-account/billing-payments/about-your-bill/rates-tariffs>

III.b. Universal access

The Plan provides for universal access for all customers by guaranteeing that all customer classes will be included in the Program under equitable terms.

All retail electric customers will have access to the Program. All retail electric customers receiving Default Service supply from the electric distribution utility will be eligible for automatic enrollment in the Program ("Eligible Customers"), and they will be automatically enrolled in the Program unless they choose to opt out.

All customers will have the right to opt-out of the Program at any time with no charge.

As required by the statute, there shall be equitable treatment of Applicable Classes within the Program.

III.c. Equitable treatment

The community power statute requires equitable treatment of all classes of customers subject to any differences arising from varying opportunities, tariffs and arrangements between different electric distribution utilities in their respective franchise territories. This does not mean that all classes of customers must be treated "equally," but rather that similarly situated classes of customers be treated "equitably."

Among applicable classes of customers, the Plan makes four distinctions.

First, the Program will distinguish among customer classes by soliciting separate pricing for each of the same customer classes the electric distribution utility uses for the distribution service.

Second, the Program will distinguish between customers that participate in the New Hampshire Electric Assistance Program (EAP) and other customers by assigning a

default product to EAP customers and a default product to all other customers.

Third, the Program will distinguish between customers receiving the default product and customers that affirmatively choose an optional product. Customers selecting an optional product will be charged the price associated with that product.

Fourth, the Program will distinguish between customers that join the Program through an automatic enrollment process (i.e. customers who do not choose to opt-out) and customers that affirmatively elect to join the Program. Such distinction will determine whether the customer receives the price specified for their rate class and product set in the Electricity Supply Agreement (“Program pricing”) or a price based on market prices at the time the customer joins the Program.

- Customers that join through an automatic enrollment process include a) the initial Eligible Customers at the start of the Program and b) new Eligible Customers that move into the City after the Program start-date. All initial Eligible Customers will receive the Program pricing for their rate class. Among new Eligible Customers, the Program will distinguish between new residential and small commercial customers, who will receive the Program pricing, and all other commercial and industrial customers, who may receive pricing based on market prices at the time the customer joins the Program.
- Finally, customers that affirmatively elect to join include two types of customers: a) customers that were being served by a Competitive Supplier at the start of the Program but then later join the Program; and b) customers re-joining the Program after having previously opted out. Those customers that were being served by a Competitive Supplier at Program initiation but who later join the Program will be treated the same as new Eligible Customers – residential and small commercial customers will receive the Program pricing and all other commercial and industrial customers may be offered a price based on the then-current market rates. All customers that join the Program after having previously opted out may be offered a price based on then-current market rates rather than the Program price. This distinction is designed to limit any incentive for frequent switching back and forth between the Program and Default Service of the electric distribution utility.

III.d. Reliability

Reliability has both physical and financial components. The Program will address both through the Electricity Supply Agreement (“ESA”) with the Competitive Electric Power Supplier (“Competitive Supplier”), which shall be the Load Serving Entity. From a physical perspective, the ESA commits the Competitive Supplier to provide all-requirements power supply and to use proper standards of management and operations. All-requirements power supply includes all of the electrical energy, capacity, reserves,

ancillary services, transmission services, transmission and distribution losses, congestion management, and other such services or products necessary to provide firm power supply to Program participants and meet the state’s Renewable Portfolio Standard and any additional renewable energy requirements of the default or optional products. The electric distribution utility will continue to remain responsible for delivery service, including the physical delivery of power to the customer, maintenance of the delivery system, and restoration of power in the event of an outage. From a financial perspective, the ESA requires the Competitive Supplier to pay actual damages for any failure to provide supply at the contracted rate (i.e., to pay the difference between the contract rate and the utility supply rate). The ESA requires the Competitive Supplier to maintain insurance and the Request for Proposals for a Competitive Supplier will require that an investment-grade entity either execute or guarantee the ESA. Accordingly, the Program satisfies the reliability requirement of the statute.

IV. Organizational Structure

IV.a Roles

Community Power Committee (CPC): The Finance, Organization and Personnel Committee, a standing committee of the City Council, voted to request that the Mayor constitute an ad-hoc Community Power Committee, as the designee of the Mayor and as established under RSA 53-E:6, to develop and approve a Community Power Plan for submission to and adoption by the City Council, as the legislative body of the City. The Committee will develop a draft plan, hold public hearings on the plan to solicit public input, revise the draft plan based on that input, and ultimately submit an approved Plan to the City Council. See **Exhibit I** for detail on the public input process.

City Council: In accordance with RSA 53-E:7, the City Council, as the legislative body of the municipality, will be the body to adopt the Community Power Plan after it has been approved by the Community Power Committee. The City Council will review and approve any proposed amendments to the Plan.

City Manager: The City Manager is designated by the City Council to provide direct management and oversight of the Plan on behalf of the City. The City Manager, or their designee(s), shall regularly meet with the Community Power Consultant for the purpose of providing oversight of the Plan and shall make recommendations to the City Council on Plan amendments. The City Manager shall authorize the issuance of bids for power supply and shall negotiate and execute a Electric Service Agreements (“ESA”) consistent with the products and goals described in this Plan.

Community Power Consultant: The Community Power Consultant will manage certain Program activities under the direction of the City Manager. Their responsibilities will include managing the supply procurement, developing and implementing the public

education plan, interacting with the electric distribution utility and monitoring the supply contract, as detailed in the professional services agreement.

Competitive Supplier: The Competitive Supplier will provide power for the Program, provide customer support including staffing a toll-free number for customer questions, and fulfill other responsibilities as detailed in the ESA. The Competitive Supplier shall be required to enter into an individual ESA with the City under terms deemed reasonable and appropriate for the retail electric customers by the City Manager.

Buying Group: The City may elect to join with other municipal aggregators in combining its load for purposes of soliciting bids from Competitive Suppliers. The purpose of the Buying Group is to allow municipal aggregators to capture the benefits of collective purchasing power while retaining full municipal autonomy. The City shall be represented by the City Manager, or their designee, on the executive committee of the Buying Group. The City, through the City Manager or their designee, shall select a Competitive Supplier based on the needs of the City and shall not be required to select the same terms or Competitive Supplier as other members of the Buying Group.

Retail electric customers: Retail electric customers shall include all electric customers taking distribution service of electricity located within the geographic boundaries of the City of Keene.

IV.b. Data Security

Pursuant to RSA 363:38 and PUC 2004.19, the Program, as an aggregator, is required to protect individual customer data that it may receive as part of Program implementation. See Exhibit III for the data protection plan to be used by the Program.

V. Electricity Supply Product Options

V.a. Default and Optional Electricity Supply Products

The Program offered the following electricity supply products in its initial ESA and may adjust these products in subsequent ESAs, taking into account the goals of the Program, market conditions and implementation experience. Current product offerings will always be posted at the Program website, [KeeneCommunityPower.com](https://www.keenecommunitypower.com). Any retail electric customer that joins through an automatic enrollment process, shall be enrolled into the Program's default product, unless they affirmatively choose to enroll in any of the optional products.

	Default Product (Automatic enrollment)	Optional Products		
Product Name	Keene Local Green	Keene Basic	Keene 50% Local Green	Keene 100% Local Green
Product Goals	Increase renewable energy use while maintaining competitive rates	Most competitive rate (no increase in renewable energy use)	Significant increase in renewable energy use (e.g. 50%)	Largest increase in renewable energy use (e.g. 100%)

- Default Product

- **Keene Local Green:** The Program intends to offer Keene Local Green as its default product. The Keene Local Green product has a goal of maintaining rough cost parity with Eversource’s Default Service supply while including extra renewable electricity above the Renewable Portfolio Standard (“RPS”) required in New Hampshire. The exact amount of extra renewable electricity will be determined after the receipt of bids from competitive suppliers. It is expected to include 5-10% extra renewable energy in the initial ESA. It is the City's goal to increase this amount in subsequent ESAs, while maintaining cost parity with Eversource’s Default Service. This product is intended to include as much local renewable energy as possible, as defined in Section V.b. Including additional renewable energy in this product enables customers to have a meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

- Optional Products

- **Keene Basic:** Some customers may feel that the amount of new, renewable energy required by the RPS in New Hampshire is sufficient to fulfill their renewable energy objectives. This product offers the same amount of renewable energy as Default Service from Eversource as required by the RPS of New Hampshire. Keene Basic will be the lowest cost option in the Program.
- **Keene 50% Local Green:** For customers that want more renewable electricity than is offered by Keene Local Green, this product offers up to 50% local renewable energy above the RPS. The City reserves the right to adjust the amount of renewable energy to be included with this product and that amount will be the same for all customers choosing this option. This

product enables customers who chose this option to have a more meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

- **Keene 100% Local Green:** For customers that want more renewable electricity than is offered by Keene Local Green, this product offers up to 100% local renewable energy above the RPS. City reserves the right to adjust the amount of renewable energy to be included with this product and that amount will be the same for all customers choosing this option. This product enables customers who chose this option to have a more meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

The Program reserves the right to adjust product names as needed.

The Program notes that it cannot guarantee savings for any of its products compared to the utility Default Service rates, because utility Default Service rates may not be known for the entirety of any Program supply contract.

Any charge for the additional renewable energy would be included in the rate submitted to the electric distribution utility or be purchased separately as Renewable Energy Certificates (“RECs”) from a third party. RECs are the accepted legal instrument used to track renewable energy generation and to substantiate claims of renewable energy use. For every one megawatt-hour (MWh) of renewable electricity that is generated and fed onto our electricity grid, one REC is created. In order to claim the use of a certain quantity of renewable energy, one must hold and retire an equivalent quantity of RECs. Retiring a REC ensures that there can be no double counting of renewable energy (i.e. no one else may claim to use the same REC once it has been retired).

V.b. Green & Local Definitions

The term “Green” means that the product contains additional renewable energy, substantiated through REC retirement, above that required by state law.

“Local” means that the additional RECs come from renewable energy sources that are part of our ISO-New England electricity grid. This means the sources are located in New England or the energy is imported as allowed by ISO-New England from locations such as New York or eastern Canada. This stands in contrast to some electricity supplies that obtain RECs from national sources (e.g. Texas) in which the electricity is not part of our ISO-New England electricity grid.

In its procurement, as described in Section VI.a, Keene seeks to support renewable energy generation located within Keene or as close to Keene in New Hampshire as possible. Keene also seeks to support the growth of renewable energy, thereby displacing

fossil fuels and reducing greenhouse gas (GHG) emissions.

V.c. NH Class I Renewable Energy

New Hampshire Class I renewable energy is known as “new renewable energy”. The State requires all electricity supplies to include a minimum quantity of Class I renewable energy, and that amount increases annually (currently plateauing after 2025). This increasing requirement, along with similar requirements in other New England states, has been a major driver of the growth of renewable energy in our region. If the Program voluntarily purchases additional Class I renewable energy at significant scale, Keene will augment this growth even further.

Class I renewable energy can come from wind, solar, small hydroelectric, biomass, methane, as well as hydrogen and ocean thermal, tidal or wave energy. These categories align with the Keene Energy Plan’s support for “Green Power” as defined by the US Environmental Protection Agency (EPA). All Class I renewable energy must have started operation after January 1, 2006 and must be physically delivered to our regional electricity grid, which means it can come from New England, New York or eastern Canada.

- Additional detail on NH Class I renewable energy, as well as the other classifications of renewable energy covered by the New Hampshire Renewable Portfolio Standard, may be found at <https://www.energy.nh.gov/renewable-energy/renewable-portfolio-standard>
- Additional detail on EPA’s Green Power definition can be found at <https://www.epa.gov/green-power-markets/learn-about-green-power-market>.

As described above, the City intends to purchase a portion of the RECs from renewable energy generators and include these RECs in a renewable energy product. If RECs are obtained through the Competitive Supplier, any charge for these RECs would be included in the same rate submitted to the electric distribution utility.

VI. Operation

The implementation of the Community Power Program requires extensive interaction between the City, the Competitive Supplier, and the electric distribution utility.

Following adoption of the Plan by the City Council, the key operational steps will be:

- a. Issue a Request for Proposals (RFP) for power supply, select a Competitive Supplier and provide notice
- b. Implement a public information program, including a Customer Notification Letters
- c. Enroll customers and provide service, including quarterly notifications and annual

- reporting
- d. Plan for Program evolution

These steps are described in the sections below.

VI.a. Issue an RFP for power supply, select a competitive supplier and provide notice

The City, under direction of the City Manager or its designee, will solicit bids from leading competitive suppliers, including those currently supplying community power programs in New England and other states. In seeking bids from competitive suppliers, the City may solicit bids for its load individually or as part of a Buying Group with other municipal aggregators. The RFP will require that the supplier satisfy key threshold criteria, including:

- Registration with the New Hampshire Public Utilities Commission (NHPUC)
- Strong financial background
- Experience serving the New England competitive market or community power programs (also known as municipal aggregations) in other states
- Demonstrated ability, supported by references, to provide strong customer service.
- Demonstrated ability to use Electronic Data Interchange (“EDI”) for enrollment of customers with the electric distribution utility or a plan to successfully complete testing required to use the electric distribution utility’s EDI prior to the mailing of the Customer Notification Letters

In addition, suppliers will be required to agree to the substantive terms and conditions of the ESA, including, for example, the requirement to:

- Provide all-requirements power supply at a fixed price
- Allow customers to exit the Program at any time on their next regular meter read with no charge
- Agree to specified customer service standards
- Comply with all requirements of the NHPUC and the electric distribution utility

The RFP will include data on Eligible Customer load and other characteristics provided to the City by the electric distribution utility pursuant to Puc 2204.02.

The City will solicit price bids from suppliers that meet the threshold criteria and agree to the terms and conditions of the ESA. The City will request bids for a variety of term lengths (e.g. 12, 24, 36 or 48 months) and for power from different sources. The City Manager, or their designee(s), will determine the number of products, the appropriate level of renewable energy to be included with the default product and the optional products based upon their assessment of market conditions and what would be in the best

interest of retail electric customers at the time of the solicitation. As noted in Section V.a., all claims of renewable energy use will be substantiated by the supplier obtaining and retiring the appropriate quantity of RECs. The City will require bidders to identify the technology, vintage, and location of the renewable energy generators that are the sources of the RECs. It will also require that the RECs be created and recorded in the New England Power Pool Generation Information System. The City may seek RECs from a variety of renewable energy sources; may elect to procure from those sources RECs, power or both; and will choose the best combination of environmental benefits and price. All additional RECs, above those required by the RPS, are initially expected to be New Hampshire Class I eligible RECs or RECs from sources located within the greater Monadnock region.

The City may provide customers with renewable energy generation source information through a variety of vehicles including the Program web site, content disclosure labels and the customer notification letter.

In consultation with its Community Power Consultant, the City Manager, or its designee, will evaluate the bid results including price, term and source. Whether the City conducts an individual solicitation or participates in a solicitation with a Buying Group, at the conclusion of the bidding process it will select a price, term and supplier appropriate for its retail electric customers. Participation in the Buying Group shall not require the City to select the same price, terms or supplier as other members of the Buying Group. If a bid is satisfactory, the City Manager, or its designee, shall execute an Electric Service Agreement (“ESA”) with the selected supplier(s). The City reserves the right to select supplier(s) per customer class (as distinguished in Section III.c. to ensure equitable treatment). If none of the bids is satisfactory, the City will reject all bids and repeat the solicitation for bids as often as needed until market conditions yield a price that is acceptable. The City will only accept a bid that enables it to launch the Program with a price, terms and characteristics that meet the criteria set by their municipal officials.

The City will provide written notice of its acceptance of a bid and the Program’s date of commencement of service to the NHPUC, the Office of Consumer Advocate, the Department of Energy as required by Puc 2204.04.

The Program will utilize consolidated billing such that the participating customers receive a single bill from the electric distribution utility that includes the charges for the Program’s electricity supply and all other charges from the electric distribution utility. The Program will confirm this choice of billing service by notifying the electric distribution utility of prior to the enrollment of customers, including providing any applicable Product details required pursuant to Puc 2205.16.

VI.b. Implement public information program including Customer Notification Letters

An Education and Outreach Plan is required to fully inform and educate potential customers and participants in advance of automatic enrollment in the Community Power Program. Customers, including customers with limited English language proficiency and disabilities, must be informed that they would be automatically enrolled in the Program and that they would have the right to opt-out of the Program without penalty. The purpose of the Education and Outreach Plan is to raise awareness and provide retail electric customers with information concerning their opportunities, options and rights for participation in the Program. To facilitate the Education and Outreach Plan, the City will utilize contact information for retail electric customers provided to the City by the electric distribution utility pursuant to Puc 2004.03.

The Education and Outreach Plan (**See Exhibit II**) consists of five components:

i. Initial Outreach and Education: This will be conducted after the selection of a Competitive Supplier and prior to arrival of the customer notification letter. It is intended to promote general awareness of the upcoming Program, minimize any questions generated by the arrival of the customer notification letter and maximize recipients' ability to make an informed choice about their participation in the Program. This effort will include information about the goals of the Program, the basic terms and conditions including renewable energy components, and the opt-out process. This effort will also include posting of the Program's product information for residential and small commercial customers on the Department of Energy's shopping comparison website. Such information will be posted on the website in advance of mailing the Customer Notification Letters.

ii. Customer Notification Letters: In addition to the initial outreach and education initiatives, a notice ("Customer Notification Letter") will be mailed to every retail electric customer. The Program will have two versions of this letter, one for Eligible Customers and one for other customers.

The Customer Notification Letter for Eligible Customers will contain a description of the aggregation program; the implications to the City; the rights and responsibilities that the participants will have under the Program; all details, including all rates, on the products offered by the Program; explain that the customer will be automatically enrolled in the default product unless they choose otherwise and identify the deadline to make such a choice; have instructions for how to not participate (opt out) via web, phone or a pre-addressed envelope and opt-out reply card included with the letter; and instruction for how to enroll in an optional Program product. The opt-out period will last a minimum of 30 days from the date of mailing of the Customer Notification Letters.

The Customer Notification Letter for other customers will, at a minimum, contain a description of the aggregation program, the implications to the City, and instructions for how to enroll in any of the Program products if desired.

Prior to the mailing of the Customer Notification Letters, the Program will confirm with the Competitive Supplier and the electric distribution utility that the Competitive Supplier is able to use EDI for enrollment of Default Service customers into the Program.

iii. Opt-Out Period Education & Outreach: After the Customer Notification Letters have been sent, the City will continue its education and outreach to afford residents and businesses the opportunity to learn more and find answers to key questions relating to their decision to opt out or enroll in one of the optional products of the Program. This will include, at a minimum, a public information meeting within 15 days of the mailing of the customer notification letter.

iv. Timeline and Preliminary Marketing Plan for Launch: This component identifies the steps the City intends to take in marketing the Program including identification of media and other community resources, examples of education and outreach documents, and an expected timeframe for the outreach effort.

v. Ongoing Outreach & Education: This component describes the expected outreach and education activities following Program launch. Key elements include:

- Program goals and performance, particularly as they relate to progress towards the City’s ambitious short- and long- term goals for renewable energy, particularly for 2030 and 2050.
- On-going campaigns to recruit participation into its optional product(s) that contain more renewable energy than required by law (“Opt up campaigns”). Increasing participation in these products will serve the City’s goals to expand new renewable energy and increase overall renewable energy use; AND
- Promotion and support of the NHSaves energy efficiency program, and future energy efficiency and weatherization programs

The attached Education and Outreach Plan (**Exhibit II**) describes in detail the City’s anticipated outreach efforts, including a timeline.

VI.c. Enroll customers and provide service

i. Enroll Customers: After the conclusion of the opt-out period (i.e. no sooner than

37 days from the date of the postmark of the Customer Notification Letters, which includes 3 days for mailing, 30 days for customer consideration, and an additional 3 days for return of the replay card), the Competitive Supplier will enroll into the Program all retail electric customers on Default Service with the electric distribution utility who did not opt out and any other retail electric customers that have affirmatively requested in writing or through email to be enrolled into the Program. All enrollments and other transactions between the Competitive Supplier and the electric distribution utility will be conducted in compliance with the relevant provisions of New Hampshire Public Utilities Commission regulations, Terms and Conditions for Competitive Suppliers, and the protocols of the New Hampshire Electronic Business Transaction (EBT) standards.

After enrollment of each customer, the Program may receive billing information for each enrolled customer from the electric distribution utility pursuant to Puc 2205.13.

ii. Provide Service: Once customers are enrolled, the Program will provide all-requirements power supply service. The Program will also provide ongoing customer service, maintain the Program website, and process customer enrollments, ongoing opt outs, and customer selections of optional products. The Program will provide Energy Source Disclosure labels to participants as required by RSA 378:49.

Prior to the expiration of the initial ESA, the City intends to solicit a new power supply agreement, as described in **Section XIII. Method of Terminating and Entering Agreements with Other Entities**. If the City elects not to enter into a new power supply agreement, participating customers would return to Default Service as described in **Section XV. Extensions or Termination of Program**.

Retail electric customers that apply for new service with the electric distribution utility (e.g., new customers move into the City or move within the City), they will initially be enrolled in Default Service supply provided by the electric distribution utility. The Program will mail such customers a Customer Notification Letter for Eligible Customers per section IV.b.ii detailing the Plan and an opt-out card. At the end of the opt-out period they will be enrolled in the Program unless they elect to opt-out, per section IV.c.i. New customers also may proactively enroll by contacting the Program directly.

The City will update the information on the Program's products on the Department of Energy's comparison shopping website whenever such information changes.

iii. Annual Report: On an annual basis, the City Manager, or its designee(s) will report to the City Council on the status of the Community Power Program,

including the number of customers enrolled and opting-out, kilowatt-hour usage, customer savings, participation in renewable energy products, and such other information as the City may request. The information for this report will be prepared by the Community Power Consultant, and the Community Power Consultant will assist or lead in presenting to the City Council as desired by the City Manager.

iv. Data Portal: The Community Power Consultant will make available to the City Manager and its designee(s) a secure, password-protected cloud-based data portal that provides the ability to run reports on key Program metrics and performance.

VI.d. Plan for Program evolution

City seeks to continually improve the Program and progress towards its long-term goals. To this end, the Community Power Consultant and City will regularly assess new opportunities such as technologies, services, regulatory policy changes, and more for their applicability to the Program. Community Power Consultant will develop appropriate strategies to integrate these opportunities into the Program. Community Power Consultant will support the City to present new opportunities to the City Council for their consideration and approval, if amendments to the Plan are needed.

VII. Funding

All of the costs of the Program will be funded through the per kilowatt-hour rates established in the ESA. Only Program participants will pay for the costs of the Program, listed below.

The primary cost will be the cost of the Competitive Supplier for the power supply, which will be funded through a per kilowatt-hour power supply rate component. These costs will be established through the competitive solicitation for a supplier.

The administrative costs of the Program will be funded through a per kilowatt-hour administrative rate component that will be paid by the Competitive Supplier to the Community Power Consultant, as specified in the ESA. This rate component will cover the services of the Community Power Consultant, including developing the Community Power Plan, managing the supply procurement, developing and implementing the public education plan, providing customer support, interacting with the electric distribution utility, monitoring the supply contract, and providing ongoing reports.

The City may choose to collect a per kilowatt-hour discretionary energy reserve fund rate component that will be paid by the Competitive Supplier to the City, as specified in the ESA. The City shall deposit and maintain such amounts in an enterprise fund to be used for the cost of providing energy-related benefits to Program participants and supporting

Program goals. Examples of such uses include (1) supporting development of new renewable energy projects, (2) supporting electrification of thermal and transportation uses, and (3) other energy-related programs and services. The City Council shall provide authorization for the use of funds from the discretionary energy reserve fund rate component. The City Manager will determine the appropriate amount of discretionary energy reserve fund rate component to include in each product in each ESA, within a range pre-approved by the City Council.

VIII. Rate Setting and Other Costs to Participants

The Program is offered on an opt-out basis, such that Eligible Customers will be automatically enrolled unless they proactively choose to opt out.

As described above, the Program's per kilowatt-hour rates will include the power supply, administrative, and discretionary energy reserve fund rate components, and applicable taxes pursuant to the ESA. Prices, terms, and conditions may differ among customer classes, which classes will be the same as the Default Service customer classes of the electric distribution utility. The frequency of price changes will be determined through the competitive bid process. The City expects to solicit bids for a number of different contract terms. Prices may change as specified in the winning bid and customers will be notified of price changes through media releases and postings on the Community Power Program website.

Regulatory events, such as new or altered requirements for the Renewable Portfolio Standard, or new taxes may result in a direct, material increase in costs during the term of the ESA. In such cases, the City and the Competitive Supplier will negotiate a potential change in the Program price. At least 30 days prior to the implementation of any such change, the City will notify customers of the change in price by issuing a media release and posting a notice in City Hall and on the Program website. The City shall also notify the NHPUC Consumer Services and External Affairs Division prior to implementation of any change in the Program price related to a regulatory event or new taxes. Such notice shall be provided prior to notifying customers and will include copies of all media releases, postings on the City and Program websites and any other communications the City intends to provide to customers regarding the price change.

The Program affects only the electricity supply charges of the customers. Delivery charges will be unchanged and will continue to be charged by the electric distribution utility in accordance with tariffs approved by the NHPUC.

Participants in the Program will receive one bill from the electric distribution utility that includes both the power supply charge of the Competitive Supplier and the delivery charge of the electric distribution utility. Any applicable taxes will be billed as part of the Program's power supply charge.

Participants in the Program will be able to opt-out of the Program and transfer to Default Service with the electric distribution utility or to another competitive supplier. Such requests submitted to the Program will be submitted by the Competitive Supplier to the electric distribution utility for processing on the customer's next available regular meter read date. There shall be no penalty or exit fee for such transfer. Customers requesting transfer of supply service upon dates other than on the next available regular meter reading date may be charged an off-cycle meter reading and billing charge if such a service is available from the electric distribution utility.

IX. Net Metering Compensation

In accordance with RSA 362-A:9, II, the Program may determine the terms and conditions for net metering. In order to support the development of distributed energy resources within Keene, the Program will seek to offer net metering terms and conditions - for standard, alternative and group net metering - equal to or better than that provided on Default Service. To this end, the Program will evaluate the net metering terms and conditions offered by competitive suppliers as part of the procurement and bid selection process.

To ensure net metering customers can make a fully informed decision on their participation in the Program, the Program will tailor all education and outreach materials to clearly communicate any and all differences between the net metering value and operation provided by the Program and Default Service.

Additionally, the Program will evaluate how any proposed or implemented changes to the utility metering or billing infrastructure may create new opportunities to enhance the net metering benefits.

X. Electric Assistance Program and other discounts

The New Hampshire Electric Assistance Program (EAP) provides qualifying customers with a discount on their monthly electric bill. The New Hampshire Legislature authorized funding for this statewide program as part of electric utility deregulation. All electric utility ratepayers support the statewide EAP through the System Benefits Charge (SBC) portion of their electric bill.

The EAP for income-eligible customers that may qualify for a discount off their monthly electric bill would continue for participants in the Program. The level of discount depends on household income, household size and electricity usage.

The EAP discount does apply to the Supplier Services portion of an electric bill when a customer chooses an independent supplier for their electricity needs. The participants in the Program who are enrolled in the EAP will receive their discounts by the same method they presently receive their discount. Participation in the Program is independent of enrollment in the EAP and does not impact the EAP discount.

Other discount programs administered by Community Action Programs that address the needs of low-income residents would continue for participants in the Program.

XI. Aggregating Municipalities & Buying Group

Participating in a buying group may offer the potential for the City to expand its buying power for greater economies of scale and to support the City's goal of acting as a regional leader, supporting other municipalities to access the benefits for Community Power. Keene will evaluate opportunities for such a buying group before issuing a bid for competitive supply. See **Section VI.a. Issue an RFP for Power Supply and Select a Competitive Supplier** for details on the implementation of a buying group.

Additionally, the City reserves its right, in accordance with RSA 53-E:6, I, to join with other municipalities or counties for its Community Power Plan and implementing its Community Power Program. Any changes to the Community Power Plan must be reviewed and approved by the City Council.

XII. Promoting Energy Efficiency

In addition to supporting cost-competitive and cleaner electricity, the City seeks to leverage the Community Power Program to help reduce energy use. This will initially take the form of cross-promoting awareness of efficiency programs through the Program's education and outreach. The Program will also evaluate opportunities for more direct support of energy efficiency.

Promotional education will focus on existing energy efficiency and conservation programs, such as New Hampshire's Weatherization Assistance Program for low-income households and the New Hampshire Saves (NHSaves) program, which provides customers with information, incentives and support designed to save energy, reduce costs, and protect our environment statewide. NHSaves is funded by electric and natural gas ratepayers and delivered by Eversource, Liberty Utilities, New Hampshire Electric Cooperative and Unitil to make homes, businesses and towns more sustainable and more comfortable places to live and work, both now and in the future. Through NHSaves customers can receive a Home Energy Assessment. The assessment identifies energy-saving opportunities in the home and provides the customer with an energy report. The report includes information on equipment rebates and no-cost products, as well as access to 0% financing and a limited time offers, such as up to 100% off approved insulation.

The assessment can also include delivery of energy-saving products recommended by the Energy Specialist, such as LED light bulbs, advanced power strips, and thermostats that can be installed right away to start saving money and energy.

If and when additional energy efficiency and conservation programs or initiatives become available, the Program will evaluate how to incorporate them into its promotional outreach and education.

XIII. Method of Entering and Terminating Agreements with Other Entities

The process for entering, modifying, enforcing, and terminating all agreements associated with the Plan will comply with the municipal charter, federal and state law and rules and regulations, and the provisions of the relevant agreement.

The City plans to use the same process described in **Section IV.a.** of this Plan to solicit bids and enter into any subsequent ESAs with the assistance of its then-current Community Power Consultant. Customers will be notified of subsequent ESAs through press releases and public notices. The transfer of customers from the existing supplier to the new supplier will be coordinated with the electric distribution utility using established Electronic Data Interchange (EDI) protocols.

If the City determines that it requires the services of a Community Power Consultant after expiration of the existing agreement with GE/SP, it will evaluate opportunities to solicit a Community Power Consultant individually or as part of a group of municipalities aggregating the electric load of their respective customers. The City will solicit proposals for, and evaluate, potential Community Power Consultants using a competitive procurement process or alternative procedure which the City determines to be in the best interest of its customers and consistent with all applicable local, state and federal laws and regulations.

XIV. Rights and Responsibilities of Program Participants

All participants will have the right to opt out of the Program at any time without charge. They may exercise this right by any of the following: 1) calling the toll-free number of the Competitive Supplier; 2) contacting the electric distribution utility and asking to be returned to Default Service; or 3) enrolling with another competitive supplier.

All participants will have available to them the customer protection provisions of the law and regulations of New Hampshire, including the right to question billing and service quality practices. Customers will be able to ask questions of and register complaints with the City, the Community Power Consultant, the Competitive Supplier, the electric distribution utility and the NHPUC. As appropriate, the City and the Community Power

Consultant will direct customer complaints to the Competitive Supplier, the electric distribution utility or the NHPUC.

Participants will continue to be responsible for paying their bills and for providing access to metering and other equipment necessary to carry out utility operations. Participants are responsible for requesting any exemption from the collection of any applicable taxes and must provide appropriate documentation of such exemption to the Competitive Supplier.

XV. Extensions or Termination of Program

Prior to the end of the term of the initial ESA, the City will solicit bids for a new supply agreement and plans to continue the Program with the same or new competitive supplier.

Although the City is not contemplating a termination date, the Program could be terminated upon the termination or expiration of the ESA without any extension, renewal, or negotiation of a subsequent supply contract, or upon the decision of the City to dissolve the Program effective on the end date of the existing ESA. In the event of termination, customers would return to the Default Service of the electric distribution utility, unless they choose an alternative competitive supplier. The City will notify customers of a planned termination of the Program through media releases and postings on the Program website.

The City will notify the electric distribution utility of the planned termination or extension of the Program in writing. In particular, the City will provide the electric distribution utility notice: (1) 90 days prior to a planned termination of the Program; (2) 90 days prior to the end of the anticipated term of the ESA; and (3) four business-days after the successful negotiation of a new ESA. The City will also provide written notice to the NHPUC 90 days prior to a planned termination, which notice shall include copies of all media releases, City Hall and website postings and other communications the City intends to provide customers regarding the termination of the Program and the return of participants to Default Service. The City will also provide written notice 90 days prior to a planned termination to the Office of the Consumer Advocate and the Department of Energy.

In the event of unplanned termination of the Program because that the Program can no longer provide service to its customers, the Program shall provide immediate written notice to the NHPUC describing the market suspension or other event that caused the Program to no longer be able to provide service, the effective time of the inability to provide service, and the notice provided to customers of the timing and consequences of the cessation of the Program's service. The Program shall file a copy of such notice at the same time to the office of the Office of the Consumer Advocate, the Department of Energy, and the electric distribution utility.

In the event of the termination of the Program, it is the responsibility and requirement of the Competitive Supplier to return the customers to Default Service of the electric distribution utility in accordance with the then applicable EDI rules and procedures.

In the event of the termination of the Program, the balance of any funds accrued by the Program's discretionary energy reserve fund, if any, would be available for distribution or application as directed by the City Council and in accordance with any applicable law and regulation.

XVI. Planned Schedule

The planned schedule below is presented for illustrative purposes. The final schedule will be established once the Program has received all necessary approvals and will ensure compliance with the all required notification timelines prior to Program commencement.

Day	Action or Event
1	Issue RFP for Competitive Supplier
31	ESA executed between City and Competitive Supplier. Program provides required notifications to NHPUC, Department of Energy, Office of Consumer Advocate, and electric distribution utility.
32	Competitive Supplier receives retail electric customer mailing data and data needed for Eligible Customer enrollment in Program
48	Competitive Supplier, at its expense, mails Customer Notification Letters to all retail electric customers, including identifying the return date by which the reply card envelopes for Eligible Customers must be mailed and postmarked
51	Retail electric customers receive Customer Notification Letter in the mail
81	Return date by which Eligible Customers deciding to opt-out must mail a reply card in pre-paid envelope to Competitive Supplier.
85	Competitive Supplier removes all Eligible Customers who opt out from the Eligible Customer list
85	Competitive Supplier sends "supplier enrolls customer" EDI for all Eligible Customers that did not opt-out and any other customers that affirmatively elected to opt-in to the Program.
90	Service begins as of each customer's next meter read date

XVII. Conclusion

Keene's Community Power Program meets all of the requirements of the Community Power law, including providing universal access, a reliable power supply and treating all customer classes equitably. The City looks forward to launching the Program and pursuing the benefits of a competitive power supply, renewable energy, and electricity choice for its retail electric customers.

Exhibit I - Historical Overview

List of Revisions

Adopted by City Council on May 6, 2021

Amended July 31, 2022

Approved by New Hampshire Public Utilities Commission October 3, 2022

Adopted by City Council on November 3, 2022

Amended February 10, 2025

Adopted by City Council on March 20, 2025

Amended August 5, 2026

Formally adopted by City Council on **TBD**

1. Creation of Community Power Committee

On June 18, 2020 the Keene City Council approved the formation of an Ad-Hoc Community Power Committee (CPC). From City Council Minutes June 18, 2020:

FOP REPORT - COMMUNITY POWER PROGRAM & AD HOC COMMUNITY POWER COMMITTEE - ASSISTANT CITY MANAGER/COMMUNITY DEVELOPMENT DIRECTOR

The Mayor brought forward the Finance, Organization and Personnel Committee report recommending that the Mayor be requested to constitute an ad-hoc Community Power Committee to develop a Community Power Plan for submission to the City Council in accordance with RSA 53-E. A motion by Councilor Powers to carry out the intent of the report was duly seconded by Councilor Hooper. The motion passed on a roll call vote with 15 Councilors present and voting in favor.

APPOINTMENT OF AN AD HOC COMMUNITY POWER COMMITTEE

The Mayor appointed an ad hoc Community Power Committee that would be charged with developing a community power plan for the citizens of Keene. The appointments from the Mayor included: Dr. Ann Shedd, Peter Hansel, Paul Roth, Jeffrey Titus, Michael Giacomo and Daniel Belluscio. A motion by Councilor Powers to confirm the appointments was duly seconded by Councilor Bosley. On roll call vote, 15 Councilors were present and voting in favor. The appointments were confirmed.

2. Creation of a Draft Plan with public hearings

The Committee, supported by City Staff and the Community Power Consultant,

held two public information sessions on December 8, 2020 to promote awareness of the development of a Community Power Plan and to begin gathering input. Also on December 8, 2020, the Committee released a community survey open for approximately one month through January 7, 2021. The survey was available online and via paper in the Monadnock Shopper News. The online survey and the City's website, KeeneEnergyPlan.com also hosted two educational videos about Community Power. KeeneEnergyPlan.com has hosted additional educational resources about Community Power, including an FAQ page, podcast and interviews with municipal leaders from active community power (also known as municipal aggregation) programs, such as Medford, Massachusetts.

The survey received 126 responses, 97 online and 29 in paper via the Monadnock Shopper News. Key survey findings:

- 86% of respondents currently receive supply from Eversource Default Service. Such customers would be eligible for automatic enrollment in the Program.
- The survey had a well-distributed diversity of household income groups and age, as shown below:

- Respondents identified a range of benefits they are interested in with

Community Power:

- 92% of respondents were interested in including more renewable energy in their electricity. Of those interested, roughly half (45%) sought extra renewable energy if they could pay about the same they pay today. The other half (55%) was willing to pay a little or a lot more for extra renewable energy.

- When analyzing preferences for renewable energy and cost by household income, a similar pattern remains for each income group.

Those households under \$50k were more likely than other income groups to want no extra renewable energy; however, 83% of the income group was still interested in more renewable energy. Of those interested, 50% sought extra renewable energy if they could pay about the same they pay today. The other 33% was willing to pay a little or a lot more for extra renewable energy.

Do you want extra renewable energy, by household income?

- Nearly three-quarters (73%) of participants had not performed an energy audit, and the percentages were nearly identical across household income groups. There appears to be widespread opportunity for energy efficiency improvements, with nearly three-quarters (71%) reporting that they keep their thermostat lower than they would like in winter and over half (51%) reporting their home is drafty or heating costs are too high.

Energy efficiency

Survey Conclusions:

The majority of participants in Community Power programs typically remain in the default product rather than choosing any of the program optional products. Given the strong support for both renewable energy and cost parity demonstrated in the survey responses, it suggests that Keene would be well-served by a default

product designed with the goals of 1) achieving cost parity or savings compared to Eversource Default Service and 2) including some extra renewable energy.

Additionally, the survey highlighted that, for those that can afford it, the program should offer options with substantially more renewable energy for a price premium.

Although less than 8% of survey responses were not interested in extra renewable energy, it could be beneficial to have an optional product that would meet their needs by providing a lower-cost option with no extra renewable energy, particularly for those households in the lowest income bracket.

There is substantial opportunity for energy audits and efficiency improvements, suggesting support for energy efficiency by the Program would be valuable.

Respondents also cited an interest in local jobs, which the Program can support through demand for additional local renewable energy and by promotion greater participation in energy efficiency programs. Regional cooperation, particularly with neighboring municipalities, would amplify this impact as well.

Draft Plan: Public Hearings & Comments

The Committee held two additional public meetings on January 26, 2021 (12:00 pm and 6:30 pm) to present the survey findings, discuss how the results would be incorporated into the draft Community Power Plan, and provide an overview of other details to expect in the Community Power Plan.

On February 5, 2021 the draft Community Power Plan was posted publicly to the program website, [KeeneCommunityPower.com](https://www.keenecommunitypower.com). During the Committee's meeting on February 12, 2021, the Committee announced the availability of the draft Community Power Plan, invited comment and scheduled two public hearings for March 30, 2021 (12:00 pm and 6:30 pm). The Committee and the City promoted awareness of the draft Plan through diverse means including a formal hearing notice in the newspaper, press releases, postings on the City website and social media, and email outreach to the City's Community Power email list. The public was encouraged to submit comments ahead of the public hearings using the online comment form on the program's website, [KeeneCommunityPower.com](https://www.keenecommunitypower.com), and email, phone or written comment to the City's Community Development department.

The Committee received comments ahead of and during the public hearings. All public comment is available in the Committee's meeting packet for April 8, 2021.

3. Approval of Plan by Community Power Committee

The Committee discussed public comments and potential changes to the Community Power Plan during their Committee meeting on April 2, 2021. Additional public comment was provided during the meeting, and the Committee determined to reconvene on April 8, 2021 (see the Committee's meeting packet for April 8, 2021 for additional comment received).

In response to some of the public comments, the Committee revised the plan as follows:

- Adjusted the language describing the likely sources of additional renewable energy in the City's first supply contract to make it clear that local renewable energy generated within the "greater Monadnock region" could also be included, in addition to NH Class I renewable energy.
- Revised the procurement language to clearly allow for the procurement of power and Renewable Energy Credits (RECs) from the same facility (also known as "bundled") or purchase only one or the other from a facility (also known as "unbundled").
- Revised the procurement language to allow for the selection of multiple suppliers (for example, one for residential and small commercial and one for large industrial).
- Modified language throughout the plan to clarify what is meant by the term "local" in different contexts (e.g. "renewables that are on the ISO-New England electricity grid," or "within or as close as possible to Keene in New Hampshire").

The revised plan, including a red-line and clean version dated April 5, 2021, was included in the Committee's meeting packet for the meeting on April 8, 2021. During the meeting, the Committee discussed the revisions. The Committee then unanimously voted to approve the plan and recommend it to the City Council for adoption.

Subsequent to the meeting, on April 8, 2021, summary detail of the public hearings, public comment, Committee's deliberation and vote was added to the Historical Overview.

4. Adoption of Plan by City Council

At the City Council meeting on April 15, 2021 the Community Power Committee's report, which unanimously approved the City of Keene Community Power Plan and recommended adoption to the City Council, was read. The report was referred to the Finance, Organization & Personnel Committee (FOP). The FOP Committee met on April 22, 2021 to review the Plan. Representatives from City staff, the Community Power Committee and the Community Power Consultant presented to the FOP Committee, and following questions and discussion, the FOP Committee unanimously

voted to recommend adoption of the Plan. At the City Council meeting on May 6, 2021, the FOP Committee's recommendation was reported to the City Council, and the Council voted unanimously to adopt the Plan.

Subsequent to the meeting, on May 10, 2021, summary detail of the City Council review and adoption process was added to the Historical Overview.

5. Revision of Plan

The City amended the Plan in mid-March 2022 to better address questions of data security based on feedback provided by the Public Utilities Commission in orders on other Community Power plans. The City submitted its Plan to the Commission in April 2022 (DE 22-022), and it received an order in June 2022 which encouraged the City to re-submit the Plan closer to or after the completion of the rulemaking process for Community Power.

On July 27, 2022, the Commission voted to approve Community Power rules. The City further amended the Plan on July 31, 2022 to appropriately reference those rules.

6. Submission of Revised Plan to Public Utilities Commission

The City submitted the revised Plan to the Public Utilities Commission (PUC) on August 3, 2022 under the existing docket number (DE 22-022) and the PUC approved the revised Plan on October 3, 2022.

7. Adoption of Revised Plan by City Council

The City Council adopted the revised Plan at their meeting on November 3, 2022. Subsequent to the meeting, summary detail of the vote (#7) and the submission to the PUC (#6) were added to this Exhibit I.

8. Adoption of Revised Plan by City Council

The City amended the plan in February 2025 to enable it to collect additional revenue in its rates to support energy-related projects that would benefit Program participants. The City Council adopted the revised Plan at their meeting on March 20, 2025.

9. Adoption of Revised Plan by City Council

The City amended the Plan in August 2026 to enable different default products for customers on the New Hampshire Electric Assistance Program (EAP). The City Council adopted the revised Plan at their meeting on TBD.

Exhibit II - Education & Outreach Plan

1. Initial Outreach and Education

The initial outreach and education will provide a description of the Program for retail electric customers and will be conducted via traditional print and TV channels, social media, a dedicated website, public presentations and personal communications to inform retail electric customers about the Program and will include a toll-free number. This effort will provide specific information about the Program and increase public awareness of the goals of the Program and the upcoming opt-out notification process.

If any Program materials were to reference cost savings for any part of the Program, a notice would be included which states that the City cannot guarantee that the Program will provide customers with prices lower than the distribution utility's Default Service rate over the full term of any supply contract entered into by the City.

1.1 Media Outreach

Prior to the launch of the Program, the City will initiate media outreach that may include the use of local cable television shows, newspapers and social media to provide greater public education and to describe the Program, the opt-out process, the website, and the toll-free telephone number. Outreach may also include public service announcements (PSAs), scheduling interviews of Program spokespersons with local media outlets, and securing a positive media presence.

A news release may be distributed to help achieve the aforementioned goals. Follow-up news releases may be used to update the media on the status of the progress of the Program.

1.2 Notices and Public Postings

Brochures/flyers will be distributed in City offices describing the Program, the opt-out process and the toll-free telephone number in order to further reinforce the Program's details. Brochures/flyers may be placed in key gathering areas or buildings (e.g. library, Senior Center, etc.) which will create the necessary repetition of messages required to motivate customer action and build awareness and understanding.

1.3 Customer Service Center

The Program will maintain a toll-free telephone number to address retail electric customers' questions regarding the Program, deregulation, the opt-out process, price information and other issues such customers may raise.

1.4 Website

All information regarding the Program will be posted on the Program website, which is linked to the website of the City: <https://keenecommunitypower.com/>. The Program website will have links to the website of the electric distribution utility, the New Hampshire Public Utilities Commission (NHPUC), Department of Energy, and the Competitive Supplier.

1.5 Public Presentations

The Program will provide presentations to municipal officials and to interested community groups.

1.6 Outreach to Persons with Limited English Proficiency or Disabilities

The Program plans to make printed materials available in English. To accommodate limited English-speaking residents, the City will provide a translation option on its Program website (which contains all details on the Program including a description of the Program and its products, the implications to the City, and the rights and responsibilities that the participants will have under the Program) that will translate any written materials on the website into over 100 different languages. The website also will be designed with the goal of being compliant with the Americans with Disabilities Act (“ADA”) and will include formats that allow the content to be read out loud by computer assistive technology. Outreach efforts will be communicated in print and audio formats to provide access to both the hearing and visually impaired.

2. Customer Notification Letter

The Customer Notification Letters will be sent via standard mail to the billing address of each retail electric customer per section IV.b.II of the Plan. The Program will have two versions of this letter, one for Eligible Customers and one for other customers. The Competitive Supplier shall bear all expenses regarding the Customer Notification Letters.

2.1 Customer Notification Letter for Eligible Customers

Per section III.b of the Plan, all retail electric customers receiving Default Service supply from the electric distribution utility will be eligible for automatic enrollment in the Program (“Eligible Customers”). The notification envelope will be designed to appear as an official City communication and it will be clearly marked as containing time sensitive information related to the Program. The notification will contain a letter describing the Program.

The letter will inform Eligible Customers:

- a) about the Program, implications to the City and provide information regarding participation and participants' responsibilities and rights;
- b) that they have the right to opt-out of the Program without penalty;
- c) of all charges, prominently stated, with a comparison of price and primary terms of the Competitive Supplier and the current Default Service offering;
- d) that any savings under the Program compared to Default Service cannot be guaranteed because the Default Service rate is subject to changes
- e) about the opt-out process; and
- f) in languages other than English for appropriate customer groups (i.e. toll-free telephone number).

The letter will also contain an opt-out reply card with a simple check off and signature line for Eligible Customers who do not wish to participate. The envelope will be pre-stamped for return of the opt-out reply card in order to protect customer privacy.

Eligible Customers will have 33 days from the date of the mailing to mail back the opt-out card in a pre-addressed postage-paid envelope and the customer notification shall identify the specific date by which the envelopes containing the opt-out card must be postmarked. Automatic enrollment of customers will not start until three days after the date specified for the postmark of the return envelopes to allow for receipt of the opt-out cards prior to the start of automatic enrollments. New Eligible Customers will be enrolled in the Program in accordance with applicable Local Distributor Company rules. Upon initiation of service, these new Eligible Customers will receive the same customer information as all other Eligible Customers.

2.2. Customer Notification Letter for Other Customers

The Customer Notification Letter for other customers will, at a minimum, contain a description of the aggregation program, the implications to the City, and instructions for how to enroll in any of the Program products if desired.

3. Opt-Out Period Education & Outreach

After the Customer Notification Letters have been sent, City will continue its education and outreach to afford residents and businesses the opportunity to learn more and find answers to key questions relating to their decision to opt out or enroll in one of the optional products of the Program. This process will include, at a minimum, a public information meeting within 15 days of the mailing of the customer notification letter. It will also include a similar range of outreach activities as

enumerated in section 1.1 to 1.6.

4. Timeline and Preliminary Marketing Plan for Launch

The timeline and preliminary marketing plan identifies the steps the City may take to inform the community about the Program, as described in Sections 1 through 3 of Exhibit II. The schedule is designed to work towards the estimated date when the Customer Notification Letter is scheduled to arrive in customer mailboxes. The dates may be adjusted to ensure compliance with the minimum written notification timelines for the date of commencement of service to the NHPUC, the Office of Consumer Advocate, the Department of Energy Puc 2205.16.

The costs and implementation will be handled by the Community Power Consultant, under the direction of the City.

From estimated date Customer Notification Letter arrives in customer mailboxes		
Action	Days before	Days after
A. Update Program & Shopping Comparison Websites	15	Ongoing
B. Work with local media resources	15	30
C. Active social media outreach	15	30
D. Initial person presentations	15	30
E. Distribute marketing materials	15	30
F. Customer help line	15	Ongoing
G. Mail postcard to all Eligible Customers	5	-
H. Customer Notification Letters arrives	0	0

A. Program & Shopping Comparison Website Update:

Timeframe: 15 days before the estimated date that the customer notification letter arrives in customer mailboxes, then maintained on an ongoing basis.

The Program's website is <https://keenecommunitypower.com/>. After executing an ESA, the Program will update this website with a description of the Program and its

products, the implications to the City, and the rights and responsibilities that the participants will have under the Program.

The shopping comparison website is maintained by the Department of Energy to enable consumers to shop for electricity supply products. The Program will post its product information for residential and small commercial customers on the shopping comparison website. Such information will be posted on the website in advance of mailing the Customer Notification Letters.

B. Work with local media resources:

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives.

Area Newspapers:

The City will work with area print and online newspapers to disseminate accurate and timely information about the Program. As part of this targeted outreach to these papers, the City may seek a meeting with the editorial board to establish a good foundation for continued dialogue over the course of the contract. Other newspaper outlets may include other local publications.

- These papers include: Keene Sentinel, Monadnock Shopper News, and the New Hampshire Union Leader

Local Public Access Television:

The City intends to work with Cheshire TV channels for public (1301) and government (1302) access. City can record interviews about the Program and PSAs for upcoming meetings.

Other Television and Radio Stations

Develop press releases to send to other TV stations and radio stations.

- TV stations include WMUR (ABC, MANCHESTER, NH) Channel 9; WUTF (INDEPENDENT, WORCESTER, MA) Channel 27; WVTA (PBS, WINDSOR, VT) Channel 41; WWJE (INDEPENDENT, DERRY, NH) Channel 50; WEKW (PBS, KEENE, NH) Channel 52; WNEU (NBC, MERRIMACK, NH) Channel 60;
- Radio stations include WVBA (88.9 FM) Brattleboro, VT; WEVO (89.1 FM) Concord, NH; WEVN (90.7 FM) Keene, NH; WEEY (93.5 FM) Swanzey, NH; WSNI (97.7 FM) Keene, NH; WINQ (103.1 FM) Keene, NH; WKNE

(103.7 FM) Keene, NH; WYRY (105.5 FM) Keene, NH; WCNL (1010 AM) Newport, NH; WKBK (1290 AM) Keene, NH; WTSA (1450 AM) Brattleboro, VT

Municipal Staff Interviews

Develop Q&A Scripts and prepare municipal staff or volunteers for interviews.

C. Active Social Media Outreach

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives.

Boost all traditional media coverage on social media platforms, with the goal of driving traffic to the dedicated website of the City.

In concert with the communication leads of the City, develop a campaign of planned tweets and Facebook posts, timed to coincide with important milestones in order to keep ratepayers informed, particularly those that may not interact with traditional media on a regular basis. Draft content and graphics to accompany the posts, to be made by City staff.

- These accounts may include: City of Keene (Instagram, Facebook); City Manager (Twitter); Keene Community Development (Instagram, Facebook & Twitter) and Keene Public Library (Instagram, Facebook & Twitter).

Monitor various channels such as Facebook and Instagram for relevant conversations and questions about the Program. Draft responses to comments and questions and utilize social media as a critical tool in engaging with members of the community.

- These accounts may include: “Downtown Keene” Facebook page (@downtownkeene); the “Keene, NH” Facebook group (5.5k members); and “Keene NH Community Forum” Facebook group (1.5k members)

Identify key social media influencers in the City, including lawmakers, advocates and reporters. Develop a spreadsheet of the social media handles/accounts and reach out to them to keep them informed about the Program.

D. In Person Presentations

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives. This will include, as required in RSA 53:E-7, a public information meeting within 15 days of the mailing of the customer notification letter.

Local Groups

Connect with local groups and associations to see if representatives of the City can participate in an upcoming meeting or offer to host a dedicated event. Seek their assistance in identifying how to best connect with customers with limited-English capabilities or disabilities that may prevent them from accessing Program information.

- Example groups include: Neighborhood associations, Social service agencies, Business Focus Group, Rotary, Kiwanis, Lions, Chamber, Clean Energy team, Keene Young Professionals, Downtown Group, Board of Realtors, Keene Senior Center, Keene Off-campus Housing (landlords and tenants), Keene State College English as a Second Language (ESL) classes, CALL Program (Cheshire Academy for Lifelong Learning).

Reaching the business community will be important. Presenting to the Chamber of Commerce can start this dialogue and lead to additional outreach to and connection with businesses.

Council Meetings

Present or provide materials for the Council meetings and any constituent meeting they may have.

E. Distribute marketing materials

Timeframe: 15 days before to 30 days after the estimated date that the customer Notification Letter arrives.

Many groups may have a natural interest in promoting awareness about the Program and can be provided with electronic and hard-copy materials with reference information for the Program.

Distribute to key locations such as Municipal Offices and Public Library.

F. Customer Help Line

Timeframe: 15 days before the estimated date that the customer notification letter arrives and ongoing thereafter.

Establish customer helplines with the Competitive Supplier and Community Power Consultant to answer customer inquiries.

G. Mail Postcard to all Eligible Customers

Timeframe: 5 days before the estimated date that the customer notification letter arrives.

Post Card

Send out to Eligible Customers prior to Customer Notification Letter. Establishes that there is a community-sponsored Program and increases the likelihood that recipient engages with the more detailed Customer Notification Letter.

H. Customer Notification Letters arrive

Sent to all retail electric customers. See section 2 above for details.

5. Ongoing Outreach and Education

The City intends to continue outreach and education for customers after enrollment in the Program. The costs and implementation will be handled by the Community Power Consultant, under the direction of the City. These efforts will include:

- **Program impact:** Key metrics relating to cost performance, renewable energy purchases and Program enrollment. Particularly as the Program accomplishments relate to progress towards the City's ambitious short- and long- term goals for renewable energy and greenhouse gas emission reduction. This will also include the Energy Source Disclosure labels for the electricity supply;
- **Opt up campaigns:** On-going campaigns to recruit participation into its optional product(s) that contain more renewable energy than required by law ("Opt up campaigns"). Increasing participation in these products will serve the City's goals to expand new renewable energy and reduce greenhouse gas emissions;
- **Customer awareness:** Rights and procedures for Program participants; contact information for customer inquiries, responses to frequently asked questions, and details regarding the Program's electric supply and renewable attributes.
- **Public input:** As the Program considers changes to further its progress toward a 100% renewable future and other goals, City will manage outreach to solicit input and feedback from the community.
- **Program changes and evolution:** Any changes in offerings and prices, which will be posted on the Program website that is linked to the website of the City.

The Program will utilize similar mediums for on-going education and outreach as for the initial launch education and outreach, including but not limited to: social media, traditional media, in-person meetings and presentations, outreach to local groups, video, and mail.

Translation of all materials will be provided as necessary to reach communities with limited English proficiency.

Exhibit III - Data Protection Plan

I. Introduction

The City of Keene (the “Municipality”) is developing a Community Power program (the “Program”), pursuant to RSA 53-E. A municipality that implements such a program is known as an aggregator (“Aggregator”). RSA 363:38 and PUC 2004.19 require that service providers, including Aggregators, protect individual and confidential customer data (“Individual Customer Data”). Individual Customer Data, as defined in RSA 363:38 and expanded in PUC 2004.19, means information that is collected as part of providing electric services to a customer that can identify, singly or in combination, that specific customer, and includes the customer name, address, and account number and the quantity, characteristics, or time of consumption by the customer, and also includes specific customer payment, financial, banking, and credit information. Further, Aggregators must only use Individual Customer Data for the Program’s primary purpose, which may include 1) providing or billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) researching, developing and implementing new rate structures or demand response, customer assistance, energy management or energy efficiency programs. The Municipality’s Community Power Consultant has developed this Data Protection Plan to ensure that Individual Customer Data obtained as part of operation of the Program will be protected from disclosure and/or inappropriate use.

II. Elements of the Plan

1. Access to Customer Data

As part of the Program, the Community Power Consultant, local designees of the Municipality, and competitive electricity suppliers (“Suppliers”) selected to provide electricity for the Program (collectively, “Data Administrators”) will receive access to certain information on file with a customer’s local distribution company (“LDC” or “electric distribution utility”), including, among other things, the customer’s name, mailing address, and energy usage history (“Customer Data”). In particular, depending on the status of implementation of the Program, LDC’s may provide four types of Customer Data to Data Administrators: a) aggregated customer data, b) eligible customer data, c) retail electric customer contact information, and d) enrolled customer information. Each type of Customer Data is described more fully below.

- a. Aggregated Customer Data – contains certain information for all electric customers within a municipality, aggregated by rate class or other grouping. This

may include data such as the number of customers by rate class, counts of customers participating in net energy metering by rate class, counts of customers participating in electric assistance program by rate class, the aggregated energy (kWh) for electricity consumption by month for the past 12 months or more by rate class, and revenue, receipts and past-due accounts receivable.

b. Eligible Customer Data – contains certain information for each electricity customer currently receiving utility-provided default service within a municipality. This may include data such as capacity tags for current, prior and next power years, energy (kWh) for electricity consumption for the past 12 months or more, meter reading cycle, whether customer net meters and under which terms, and group net metering data including whether customer is a group net metering host or member of a net metering group, whether a group net metering customer-generator operates as a low-moderate income community solar project, the size of any such net metered generation and the year and month it was placed into service.

c. Retail Electric Customer Contact Information – comprises certain customer contact information for the provision of Program communications, such as Customer Notification Letters to retail electric customers. This may include such data as the customer of record's name, mailing address, account number, meter number, rate class, and email address.

d. Enrolled Customer Data – contains certain information for all individual customers who elected not to opt-out of the Program during the opt-out period. This may include such data as Name of customer and customer contact, Mailing address, Service address, Account number and related meter numbers, Name key, Contact information such as phone numbers, email address, Billing account number, Preferred billing and communication method, Billing cycle, Meter read date or cycle, Form or type of meter reading, Capacity tag information for past two years, current power year and forecasted next power year, Most recent 24 months of usage data, Current and historic status of net metering, distributed generation, Preferred billing and communication method, payment plans and electric assistance program participation, and Rate class.

2. Data Security

All Customer Data that is not anonymized (i.e. presented or aggregated in such a way that removes information that can be used to identify the individual customer that it pertains to, such that it does not constitute individual customer data as defined by RSA 363:37, I or PUC 2002.09) shall be considered Individual Customer Data.

Data Administrators will utilize industry standard physical, technical, and administrative controls and procedures to safeguard Individual Customer Data collected as part of the Program and to prevent unauthorized or accidental access, destruction, loss, alteration, or disclosure of, to protect against anticipated threats or hazards to the security, confidentiality, or integrity of, and to permit only the appropriate use of, such customer information.

To protect the confidentiality, integrity, and availability of Individual Customer Data, Data Administrators will utilize a variety of industry standard physical and logical access controls, firewalls, password protections, intrusion detection/prevention systems, network and database monitoring, and backup systems. These systems will be designed to cover all networks, servers, computers, notebooks, laptops, PDAs, mobile phones, or other devices that contain Individual Customer Data, or through which Individual Customer Data is made available.

Data Administrators will limit access to Individual Customer Data to those persons and entities having a specific business purpose for maintaining and processing such information. Those granted access to Individual Customer Data will be trained on their responsibilities to protect the confidentiality, integrity, and availability of such information.

Data Administrators will work cooperatively with the LDC(s), as necessary, to implement this Data Protection Plan, and will at a minimum, implement the following actions:

- a. Conduct a risk assessment to identify and assess reasonably foreseeable internal and external risks to the security, confidentiality, and integrity of electronic, paper, and other records containing Individual Customer Data and evaluate and improve, where necessary, the effectiveness of their safeguards for limiting those internal and external risks;
- b. Timely notify the LDC(s) of any important modifications of this Data Protection Plan within a reasonable amount of time;
- c. Review and, as appropriate, revise this Data Protection Plan: (i) at least annually or whenever there is a material change in their business practices that may reasonably affect the security or integrity of Customer Data; (ii) in accordance with prevailing industry practices and applicable law; and (iii) as reasonably requested by the LDC(s). If the Data Administrators modify this Data Protection Plan following such a review, the Data Administrators will promptly notify the LDC(s) of such modifications and will provide the modifications to the LDC(s) in writing upon a LDC's request. The Data Administrators will at no time alter or modify this Data Protection Plan in such

- a way that will weaken or compromise the confidentiality, security, or integrity of Individual Customer Data;
- d. Maintain and enforce this Data Protection Plan in all locations where Individual Customer Data is processed by the Data Administrators;
 - e. Conduct security testing using a third party to provide monitoring penetration and intrusion testing with respect to Data Administrators systems and promptly provide a copy of the results to the LDC(s), provided that the third party may redact IP addresses and other client names and information;
 - f. Provide annual security awareness training to all individuals having access to Individual Customer Data and maintain a record of such training; and
 - g. Implement a standard process for identifying, assessing, and mitigating security risks.

3. Confidentiality

Data Administrators will not sell Individual Customer Data to others unless such sale is specifically authorized by the customer, or is required by law or court order. Data Administrators will not share, disclose, or provide Individual Customer Data to others, including their affiliates, unless such disclosure, or provision is required to operate the Program (i.e., the Program's "primary purpose", per RSA 363:38), is specifically authorized by the customer, or is required by law or court order. If Data Administrators request customer authorization to disclose Individual Customer Data, Data Administrators will first describe to the customer the information they intend to release and provide details concerning the recipient of such information.

Data Administrators will hold all Customer Data in strict confidence and except as otherwise needed for provision of the Program, required by law, or permitted as below, (a) not disclose Individual Customer Data to any other person or entity (including but not limited to Suppliers, subcontractors, and affiliates or members of the Community Power Consultant ; (b) not process Individual Customer Data outside of the United States; (c) not process Individual Customer Data other than in connection with the Program; (d) not process Individual Customer Data for any marketing purposes other than in connection with the Program; (e) limit reproduction of Individual Customer Data to the extent required for the Program; (f) store Individual Customer Data in a secure fashion at a secure location in the United States that is not accessible to any person or entity not authorized to receive the Individual Customer Data; and (g) otherwise use at least the same degree of care to avoid publication or dissemination of the Individual Customer Data as Data Administrators employ (or would employ) with respect to their own confidential information that they do not (or would not) desire to have published or disseminated, but in no event less than reasonable care.

4. Disclosure of Individual Customer Data

Notwithstanding the provisions of Section 3 above, the Data Administrators may disclose Individual Customer Data to their representatives who have a legitimate need to know or use such Individual Customer Data for the sole and limited purposes of administering and/or conducting the Program. Such representatives will first be advised of the sensitive and confidential nature of such Individual Customer Data and agree to comply with the provisions of this Data Protection Plan. Pursuant to PUC 200.19, Data Administrators may also provide Individual Customer Data to third parties for the purposes of 1) billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) implementing demand response, customer assistance, energy management or energy efficiency programs. Any such third parties will be required by contract to comply with the provisions of this Data Protection Plan.

In the event that Data Administrators or any of their representatives receive notice that they have, will, or may become compelled, pursuant to applicable law or regulation or legal process, to disclose any Individual Customer Data (whether by receipt of oral questions, interrogatories, requests for information or documents in legal proceedings, subpoenas, civil investigative demands, other similar processes or otherwise), Data Administrators will, except to the extent prohibited by law, immediately notify the LDC(s), orally and in writing, of the pending or threatened compulsion. To the extent lawfully allowable, the LDC(s) will have the right to consult with the Data Administrators and the parties will cooperate, in advance of any disclosure, to undertake any lawfully permissible steps to reduce and/or minimize the extent of Individual Customer Data that must be disclosed. The LDC(s) will also have the right to seek an appropriate protective order or other remedy reducing and/or minimizing the extent of Individual Customer Data that must be disclosed.

Data Administrators and their representatives will disclose only such Individual Customer Data which they are advised by legal counsel that they are legally required to disclose in order to comply with such applicable law or regulation or legal process (as such may be affected by any protective order or other remedy obtained by LDC) and Data Administrators and their representatives will use all reasonable efforts to ensure that all Individual Customer Data that is so disclosed will be accorded confidential treatment.

5. Return/Destruction of Individual Customer Data

Upon the expiration of the Program, or as otherwise required by law or Commission order, the Data Administrators will destroy all copies of any Individual Customer Data (including any and all extracts, compilations, studies or other documents based upon, derived from or containing Individual Customer Data) within their or their representatives' possession (including destroying Individual Customer Data from all systems, records, archives and backups), and all subsequent use and processing of the

Individual Customer Data by the Data Administrators and their representatives will cease.

Notwithstanding the foregoing, the Data Administrators and their representatives will not erase Individual Customer Data contained in an archived computer system backup maintained in accordance with their respective security or disaster recovery procedures. The Data Administrators will not provide access to or recovery of Individual Customer Data from such computer backup system and will keep all such Individual Customer Data confidential in accordance with this Data Protection Plan.

6. Data Security Incidents

The Data Administrators are responsible for any and all security incidents involving Individual Customer Data that is processed as part of the Program. The Data Administrators will notify the LDC(s) in writing immediately (and in any event within twenty-four (24) hours) whenever the Data Administrators reasonably believe that there has been a data security incident involving Individual Customer Data. After providing such notice, the Data Administrators will investigate the incident, and immediately take all necessary steps to eliminate or contain any exposure of Individual Customer Data. The Data Administrators will provide the LDC(s) with reasonable assistance and cooperation in the furtherance of any correction, remediation, or investigation of any such data security incidents and/or the mitigation of any damage, including any notification required by law or that LDC(s) may determine appropriate to send to individuals impacted or potentially impacted by such data security incident(s), and/or the provision of any credit reporting service required by law or that LDC(s) deems appropriate to provide to such individuals.

Unless required by law, the Data Administrators will not notify any individual or any third party other than law enforcement of any potential data security incidents involving Individual Customer Data without first consulting with, and obtaining the permission of, the LDC(s). Within 30 days of identifying or being informed of a data security incident, the Data Administrators will develop and execute a plan, with the cooperation of the LDC(s), which reduces the likelihood of a recurrence of such data security incident(s).

7. Additional Protections

The Data Administrators will comply with all applicable privacy and security laws to which it is subject, including this Data Protection Plan.

The Data Administrators will safely secure and/or encrypt all Individual Customer Data during storage and transmission.

The Data Administrators will have in place appropriate and reasonable processes and systems, including this Data Protection Plan, to protect the security of Individual Customer Data and to prevent a data security incident, including, without limitation, a breach resulting from or arising out of the Data Administrators' internal use, processing, or other transmission of Individual Customer Data, whether between or among their representatives, subsidiaries and affiliates, or any other person or entity acting on behalf of the Data Administrators.

The Data Administrators will work cooperatively with the LDC(s) to implement this Data Protection Plan, including: establishing policies and procedures to provide reasonable and prompt assistance to LDC(s) in responding to any and all requests, complaints, or other communications received from any individual who is or may be the subject of a data security incident involving Customer Data to the extent such request, complaint or other communication relates to the Data Administrators' processing of such individual's Individual Customer Data; and establishing policies and procedures to provide all reasonable and prompt assistance to LDC(s) in responding to any and all requests, complaints, or other communications received from any individual, government, government agency, regulatory authority, or other entity that is or may have an interest in the Individual Customer Data, data theft or other unauthorized release of Individual Customer Data, disclosure of Individual Customer Data, or misuse of Individual Customer Data to the extent such request, complaint or other communication relates to Data Administrators' processing of such individual's Individual Customer Data.

8. Use of Individual Customer Data

The Data Administrators will only use Individual Customer Data for the primary purposes, as defined in RSA 363:37, which may include 1) providing or billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) researching, developing and implementing new rate structures or demand response, customer assistance, energy management or energy efficiency programs.

II. Conclusion

The Data Protection Plan meets all of the requirements of RSA 363:38, RSA 363:37 and PUC 2004.19.

CITY OF KEENE COMMUNITY POWER PLAN

I. Community Power Goals and Vision

The City of Keene will develop and implement its Community Power Program (“Program”) as described in this Community Power Plan (“Plan”).

Community Power creates new electricity supply choices for Keene residents and businesses with the potential for cost and environmental benefits beyond that of the Default Service supply from the electric distribution utility, Eversource. Instead of simply utilizing Eversource’s electricity supply, Keene will bundle together the electricity needs of its residents and small businesses and put out a bid for an electricity supplier to provide the necessary electricity at competitive prices. With Community Power, the City is able to make strategic decisions about when to solicit bids, lock in fixed pricing for multiple years, and increase the amount of renewable energy above the existing statewide minimum. Eversource will continue to manage billing and maintain wires and poles.

Community Power is part of the City’s comprehensive climate and energy planning process. One of the primary goals of Keene’s process, embodied in the City Council’s 2018 Resolution R 2018-36, is to achieve 100% renewable electricity use:

“It is the goal of the City of Keene that all electricity consumed in the City will come from renewable energy sources by the year 2030 and that 100% of all thermal energy and energy used for transportation come from renewable energy sources by the year 2050. This goal will apply to the entire Keene community, not just municipal government operations.

Keene’s climate and energy planning process also seeks to support equity, energy efficiency, job creation, and climate resilience and preparedness.

To establish specific goals and a vision for the Program, the City held information sessions and surveyed community members to ask about their priorities and preferences. While individual opinions differed, there was strong support from the majority of survey respondents from all income classes and age groups for five community priorities related to electricity supply:

- Choice for electricity options
- Control of electricity costs
- Competitive rates and lower bills
- Increased local renewable energy
- Local jobs

Particularly strong among respondents was support for renewable energy. As shown at right, over 90% of all respondents indicated a desire for extra renewables, and almost half indicated a willingness to pay more for extra renewables.

The desire for extra renewable energy generally held across age and household income brackets, with the strongest support overall in the middle income bracket, as shown below.

Do you want extra renewable energy, by household income?

Detailed survey results can be found in **Exhibit I**.

The Keene community goals translate into the following goals for Keene's Community Power Program:

1. Establish a standard (or default) electricity supply product that value via competitive rates, uses more renewable energy, and s local renewable energy as defined in Section V.b.
2. Increase the contribution of renewables toward 100% renewable electricity for the entire Program by 2030, using optional products, tools and incentives that include:
 - Provide optional electricity supply products with alternative renewable electricity amounts (for example, 100%). Options afford individual participants the opportunity to meet higher renewable goals immediately and increase the overall renewable energy impact of the Program;
 - Catalyze the development of distributed energy resources within Keene, such as rooftop solar, by providing enhanced net metering and other incentives;
 - Explore opportunities to support the development of and utilize new renewable energy supply at utility scale within our region;
 - Support electrification, particularly of thermal and transportation sectors;
 - Support energy efficiency initiatives to reduce total Program electricity demand and costs for participants; and
 - Explore, and implement when possible, other tools and incentives successfully established elsewhere in New Hampshire, in other states or around the world (for example, time-of-use rate structures).
3. Engage the community to bring new ideas and resources into the Program, through

every means possible, over the life of the program. Also engage the community to assess how benefits of the Program can be allocated equitably.

4. Work with regulators, utilities and suppliers to craft solutions and remove barriers to harnessing all cost-effective solutions, especially recognizing that increased electrification will be part of the solution toward 100% transportation and thermal renewable energy by 2050.
5. Expand the Program's impact by empowering other communities with similar goals. This includes sharing information and materials to help launch other programs as well as evaluating regional buying groups as to whether they provide greater cost savings to all participants through economies of scale.

The vision for Keene Community Power is to launch a timely Community Power Program that provides community members with attractive choices and substantially enhanced renewable energy options at competitive prices, and opens a new promising community path to 100% renewable electricity in 2030.

Community Power is emerging as a leading strategy to reach multiple community goals efficiently and equitably. The City of Keene looks forward to refining this vision for meeting our 100% renewable energy goals and all of Keene's goals that are impacted by energy choices.

II. Process to Develop and Approve Plan

Before implementation, the Plan must be reviewed and approved by the Community Power Committee ("Committee") and adopted by the Keene City Council. The Committee will ensure that the Program satisfies all of the statutory requirements, including that the Plan provides universal access, reliability and equitable treatment for all classes of customers. This Plan was developed to demonstrate that the Program of the City satisfies all the requirements necessary for approval by the Committee and adoption by the City Council.

This plan was developed through the following process, consistent with New Hampshire Revised Statutes Annotated (RSA) 53-E:

1. Creation of Community Power Committee
2. Creation of a Draft Plan with public hearings,
3. Approval of Plan by Community Power Committee,
4. Adoption of Plan by City Council, and
5. Submission of Final Plan to Public Utilities Commission.

Please see **Exhibit I** for detail on these steps.

III. Customer Participation

III.a. Applicable classes of customers

The Community Power Program will be available for the residential, commercial and industrial classes of electricity customers as defined by City's electric distribution company, Eversource ("Applicable Classes"). See Eversource for current classes: <https://www.eversource.com/content/nh/residential/my-account/billing-payments/about-your-bill/rates-tariffs>

III.b. Universal access

The Plan provides for universal access for all customers by guaranteeing that all customer classes will be included in the Program under equitable terms.

All retail electric customers will have access to the Program. All retail electric customers receiving Default Service supply from the electric distribution utility will be eligible for automatic enrollment in the Program ("Eligible Customers"), and they will be automatically enrolled in the Program unless they choose to opt out.

All customers will have the right to opt-out of the Program at any time with no charge.

As required by the statute, there shall be equitable treatment of Applicable Classes within the Program.

III.c. Equitable treatment

The community power statute requires equitable treatment of all classes of customers subject to any differences arising from varying opportunities, tariffs and arrangements between different electric distribution utilities in their respective franchise territories. This does not mean that all classes of customers must be treated "equally," but rather that similarly situated classes of customers be treated "equitably."

Among applicable classes of customers, the Plan makes ~~four~~^{three} distinctions.

First, the Program will distinguish among customer classes by soliciting separate pricing for each of the same customer classes the electric distribution utility uses for the distribution service.

Second, the Program will distinguish between customers that participate in the New Hampshire Electric Assistance Program (EAP) and other customers by assigning a

[default product to EAP customers and a default product to all other customers.](#)

[Third](#)~~Second~~, the Program will distinguish between customers receiving the default product and customers that affirmatively choose an optional product. Customers selecting an optional product will be charged the price associated with that product.

[Fourth](#)~~Third~~, the Program will distinguish between customers that join the Program through an automatic enrollment process (i.e. customers who do not choose to opt-out) and customers that affirmatively elect to join the Program. Such distinction will determine whether the customer receives the price specified for their rate class and product set in the Electricity Supply Agreement (“Program pricing”) or a price based on market prices at the time the customer joins the Program.

- Customers that join through an automatic enrollment process include a) the initial Eligible Customers at the start of the Program and b) new Eligible Customers that move into the City after the Program start-date. All initial Eligible Customers will receive the Program pricing for their rate class. Among new Eligible Customers, the Program will distinguish between new residential and small commercial customers, who will receive the Program pricing, and all other commercial and industrial customers, who may receive pricing based on market prices at the time the customer joins the Program.
- Finally, customers that affirmatively elect to join include two types of customers: a) customers that were being served by a Competitive Supplier at the start of the Program but then later join the Program; and b) customers re-joining the Program after having previously opted out. Those customers that were being served by a Competitive Supplier at Program initiation but who later join the Program will be treated the same as new Eligible Customers – residential and small commercial customers will receive the Program pricing and all other commercial and industrial customers may be offered a price based on the then-current market rates. All customers that join the Program after having previously opted out may be offered a price based on then-current market rates rather than the Program price. This distinction is designed to limit any incentive for frequent switching back and forth between the Program and Default Service of the electric distribution utility.

III.d. Reliability

Reliability has both physical and financial components. The Program will address both through the Electricity Supply Agreement (“ESA”) with the Competitive Electric Power Supplier (“Competitive Supplier”), which shall be the Load Serving Entity. From a physical perspective, the ESA commits the Competitive Supplier to provide all-requirements power supply and to use proper standards of management and operations. All-requirements power supply includes all of the electrical energy, capacity, reserves,

ancillary services, transmission services, transmission and distribution losses, congestion management, and other such services or products necessary to provide firm power supply to Program participants and meet the state's Renewable Portfolio Standard and any additional renewable energy requirements of the default or optional products. The electric distribution utility will continue to remain responsible for delivery service, including the physical delivery of power to the customer, maintenance of the delivery system, and restoration of power in the event of an outage. From a financial perspective, the ESA requires the Competitive Supplier to pay actual damages for any failure to provide supply at the contracted rate (i.e., to pay the difference between the contract rate and the utility supply rate). The ESA requires the Competitive Supplier to maintain insurance and the Request for Proposals for a Competitive Supplier will require that an investment-grade entity either execute or guarantee the ESA. Accordingly, the Program satisfies the reliability requirement of the statute.

IV. Organizational Structure

IV.a Roles

Community Power Committee (CPC): The Finance, Organization and Personnel Committee, a standing committee of the City Council, voted to request that the Mayor constitute an ad-hoc Community Power Committee, as the designee of the Mayor and as established under RSA 53-E:6, to develop and approve a Community Power Plan for submission to and adoption by the City Council, as the legislative body of the City. The Committee will develop a draft plan, hold public hearings on the plan to solicit public input, revise the draft plan based on that input, and ultimately submit an approved Plan to the City Council. See **Exhibit I** for detail on the public input process.

City Council: In accordance with RSA 53-E:7, the City Council, as the legislative body of the municipality, will be the body to adopt the Community Power Plan after it has been approved by the Community Power Committee. The City Council will review and approve any proposed amendments to the Plan.

City Manager: The City Manager is designated by the City Council to provide direct management and oversight of the Plan on behalf of the City. The City Manager, or their designee(s), shall regularly meet with the Community Power Consultant for the purpose of providing oversight of the Plan and shall make recommendations to the City Council on Plan amendments. The City Manager shall authorize the issuance of bids for power supply and shall negotiate and execute a Electric Service Agreements ("ESA") consistent with the products and goals described in this Plan.

Community Power Consultant: The Community Power Consultant will manage certain Program activities under the direction of the City Manager. Their responsibilities will include managing the supply procurement, developing and implementing the public

education plan, interacting with the electric distribution utility and monitoring the supply contract, as detailed in the professional services agreement. ~~Through a competitive procurement process the City has selected the partnership of Good Energy, L.P. and Standard Power (“GE/SP”) to provide these services.~~

Competitive Supplier: The Competitive Supplier will provide power for the Program, provide customer support including staffing a toll-free number for customer questions, and fulfill other responsibilities as detailed in the ESA. The Competitive Supplier shall be required to enter into an individual ESA with the City under terms deemed reasonable and appropriate for the retail electric customers by the City Manager.

Buying Group: The City may elect to join with other municipal aggregators in combining its load for purposes of soliciting bids from Competitive Suppliers. The purpose of the Buying Group is to allow municipal aggregators to capture the benefits of collective purchasing power while retaining full municipal autonomy. The City shall be represented by the City Manager, or their designee, on the executive committee of the Buying Group. The City, through the City Manager or their designee, shall select a Competitive Supplier based on the needs of the City and shall not be required to select the same terms or Competitive Supplier as other members of the Buying Group.

Retail electric customers: Retail electric customers shall include all electric customers taking distribution service of electricity located within the geographic boundaries of the City of Keene.

IV.b. Data Security

Pursuant to RSA 363:38 and PUC 2004.19, the Program, as an aggregator, is required to protect individual customer data that it may receive as part of Program implementation. See Exhibit III for the data protection plan to be used by the Program.

V. Electricity Supply Product Options

V.a. Default and Optional Electricity Supply Products

The Program offered the following electricity supply products in its initial ESA and may adjust these products in subsequent ESAs, taking into account the goals of the Program, market conditions and implementation experience. Current product offerings will always be posted at the Program website, KeeneCommunityPower.com. Any retail electric

customer that joins through an automatic enrollment process, shall be enrolled into the Program's default product, unless they affirmatively choose to enroll in any of the optional products.

	Default Product (Automatic enrollment)	Optional Products		
Product Name	Keene Local Green	Keene Basic	Keene 50% Local Green	Keene 100% Local Green
Product Goals	Increase renewable energy use while maintaining competitive rates	Most competitive rate (no increase in renewable energy use)	Significant increase in renewable energy use (e.g. 50%)	Largest increase in renewable energy use (e.g. 100%)

- **Default Product**

- **Keene Local Green:** The Program intends to offer Keene Local Green as its default product. The Keene Local Green product has a goal of maintaining rough cost parity with Eversource's Default Service supply while including extra renewable electricity above the Renewable Portfolio Standard ("RPS") required in New Hampshire. The exact amount of extra renewable electricity will be determined after the receipt of bids from competitive suppliers. It is expected to include 5-10% extra renewable energy in the initial ESA. It is the City's goal to increase this amount in subsequent ESAs, while maintaining cost parity with Eversource's Default Service. This product is intended to include as much local renewable energy as possible, as defined in Section V.b. Including additional renewable energy in this product enables customers to have a meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

- **Optional Products**

- **Keene Basic:** Some customers may feel that the amount of new, renewable energy required by the RPS in New Hampshire is sufficient to fulfill their renewable energy objectives. This product offers the same amount of renewable energy as Default Service from Eversource as required by the RPS of New Hampshire. Keene Basic will be the lowest cost option in the Program.
- **Keene 50% Local Green:** For customers that want more renewable electricity than is offered by Keene Local Green, this product offers up to

50% local renewable energy above the RPS. The City reserves the right to adjust the amount of renewable energy to be included with this product and that amount will be the same for all customers choosing this option. This product enables customers who chose this option to have a more meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

- **Keene 100% Local Green:** For customers that want more renewable electricity than is offered by Keene Local Green, this product offers up to 100% local renewable energy above the RPS. City reserves the right to adjust the amount of renewable energy to be included with this product and that amount will be the same for all customers choosing this option. This product enables customers who chose this option to have a more meaningful impact on the reduction of greenhouse gas emissions through the support of local renewable energy sources.

The Program reserves the right to adjust product names as needed.

The Program notes that it cannot guarantee savings for any of its products compared to the utility Default Service rates, because utility Default Service rates may not be known for the entirety of any Program supply contract.

Any charge for the additional renewable energy would be included in the rate submitted to the electric distribution utility or be purchased separately as Renewable Energy Certificates (“RECs”) from a third party. RECs are the accepted legal instrument used to track renewable energy generation and to substantiate claims of renewable energy use. For every one megawatt-hour (MWh) of renewable electricity that is generated and fed onto our electricity grid, one REC is created. In order to claim the use of a certain quantity of renewable energy, one must hold and retire an equivalent quantity of RECs. Retiring a REC ensures that there can be no double counting of renewable energy (i.e. no one else may claim to use the same REC once it has been retired).

V.b. Green & Local Definitions

The term “Green” means that the product contains additional renewable energy, substantiated through REC retirement, above that required by state law.

“Local” means that the additional RECs come from renewable energy sources that are part of our ISO-New England electricity grid. This means the sources are located in New England or the energy is imported as allowed by ISO-New England from locations such as New York or eastern Canada. This stands in contrast to some electricity supplies that obtain RECs from national sources (e.g. Texas) in which the electricity is not part of our ISO-New England electricity grid.

In its procurement, as described in Section VI.a, Keene seeks to support renewable energy generation located within Keene or as close to Keene in New Hampshire as possible. Keene also seeks to support the growth of renewable energy, thereby displacing fossil fuels and reducing greenhouse gas (GHG) emissions.

V.c. NH Class I Renewable Energy

New Hampshire Class I renewable energy is known as “new renewable energy”. The State requires all electricity supplies to include a minimum quantity of Class I renewable energy, and that amount increases annually (currently plateauing after 2025). This increasing requirement, along with similar requirements in other New England states, has been a major driver of the growth of renewable energy in our region. If the Program voluntarily purchases additional Class I renewable energy at significant scale, Keene will augment this growth even further.

Class I renewable energy can come from wind, solar, small hydroelectric, biomass, methane, as well as hydrogen and ocean thermal, tidal or wave energy. These categories align with the Keene Energy Plan’s support for “Green Power” as defined by the US Environmental Protection Agency (EPA). All Class I renewable energy must have started operation after January 1, 2006 and must be physically delivered to our regional electricity grid, which means it can come from New England, New York or eastern Canada.

- Additional detail on NH Class I renewable energy, as well as the other classifications of renewable energy covered by the New Hampshire Renewable Portfolio Standard, may be found at <https://www.energy.nh.gov/renewable-energy/renewable-portfolio-standard>
- Additional detail on EPA’s Green Power definition can be found at <https://www.epa.gov/green-power-markets/learn-about-green-power-market>.

As described above, the City intends to purchase a portion of the RECs from renewable energy generators and include these RECs in a renewable energy product. If RECs are obtained through the Competitive Supplier, any charge for these RECs would be included in the same rate submitted to the electric distribution utility.

VI. Operation

The implementation of the Community Power Program requires extensive interaction between the City, the Competitive Supplier, and the electric distribution utility.

Following adoption of the Plan by the City Council, the key operational steps will be:

- a. Issue a Request for Proposals (RFP) for power supply, select a Competitive Supplier and provide notice

- b. Implement a public information program, including a Customer Notification Letters
- c. Enroll customers and provide service, including quarterly notifications and annual reporting
- d. Plan for Program evolution

These steps are described in the sections below.

VI.a. Issue an RFP for power supply, select a competitive supplier and provide notice

The City, under direction of the City Manager or its designee, will solicit bids from leading competitive suppliers, including those currently supplying community power programs in New England and other states. In seeking bids from competitive suppliers, the City may solicit bids for its load individually or as part of a Buying Group with other municipal aggregators. The RFP will require that the supplier satisfy key threshold criteria, including:

- Registration with the New Hampshire Public Utilities Commission (NHPUC)
- Strong financial background
- Experience serving the New England competitive market or community power programs (also known as municipal aggregations) in other states
- Demonstrated ability, supported by references, to provide strong customer service.
- Demonstrated ability to use Electronic Data Interchange (“EDI”) for enrollment of customers with the electric distribution utility or a plan to successfully complete testing required to use the electric distribution utility’s EDI prior to the mailing of the Customer Notification Letters

In addition, suppliers will be required to agree to the substantive terms and conditions of the ESA, including, for example, the requirement to:

- Provide all-requirements power supply at a fixed price
- Allow customers to exit the Program at any time on their next regular meter read with no charge
- Agree to specified customer service standards
- Comply with all requirements of the NHPUC and the electric distribution utility

The RFP will include data on Eligible Customer load and other characteristics provided to the City by the electric distribution utility pursuant to Puc 2204.02.

The City will solicit price bids from suppliers that meet the threshold criteria and agree to the terms and conditions of the ESA. The City will request bids for a variety of term lengths (e.g. 12, 24, 36 or 48 months) and for power from different sources. The City

Manager, or their designee(s), will determine the number of products, the appropriate level of renewable energy to be included with the default product and the optional products based upon their assessment of market conditions and what would be in the best interest of retail electric customers at the time of the solicitation. As noted in Section V.a., all claims of renewable energy use will be substantiated by the supplier obtaining and retiring the appropriate quantity of RECs. The City will require bidders to identify the technology, vintage, and location of the renewable energy generators that are the sources of the RECs. It will also require that the RECs be created and recorded in the New England Power Pool Generation Information System. The City may seek RECs from a variety of renewable energy sources; may elect to procure from those sources RECs, power or both; and will choose the best combination of environmental benefits and price. All additional RECs, above those required by the RPS, are initially expected to be New Hampshire Class I eligible RECs or RECs from sources located within the greater Monadnock region.

The City may provide customers with renewable energy generation source information through a variety of vehicles including the Program web site, content disclosure labels and the customer notification letter.

In consultation with its Community Power Consultant, the City Manager, or its designee, will evaluate the bid results including price, term and source. Whether the City conducts an individual solicitation or participates in a solicitation with a Buying Group, at the conclusion of the bidding process it will select a price, term and supplier appropriate for its retail electric customers. Participation in the Buying Group shall not require the City to select the same price, terms or supplier as other members of the Buying Group. If a bid is satisfactory, the City Manager, or its designee, shall execute an Electric Service Agreement (“ESA”) with the selected supplier(s). The City reserves the right to select supplier(s) per customer class (as distinguished in Section III.c. to ensure equitable treatment). If none of the bids is satisfactory, the City will reject all bids and repeat the solicitation for bids as often as needed until market conditions yield a price that is acceptable. The City will only accept a bid that enables it to launch the Program with a price, terms and characteristics that meet the criteria set by their municipal officials.

The City will provide written notice of its acceptance of a bid and the Program’s date of commencement of service to the NHPUC, the Office of Consumer Advocate, the Department of Energy as required by Puc 2204.04.

The Program will utilize consolidated billing such that the participating customers receive a single bill from the electric distribution utility that includes the charges for the Program’s electricity supply and all other charges from the electric distribution utility. The Program will confirm this choice of billing service by notifying the electric distribution utility of prior to the enrollment of customers, including providing any applicable Product details required pursuant to Puc 2205.16.

VI.b. Implement public information program including Customer Notification Letters

An Education and Outreach Plan is required to fully inform and educate potential customers and participants in advance of automatic enrollment in the Community Power Program. Customers, including customers with limited English language proficiency and disabilities, must be informed that they would be automatically enrolled in the Program and that they would have the right to opt-out of the Program without penalty. The purpose of the Education and Outreach Plan is to raise awareness and provide retail electric customers with information concerning their opportunities, options and rights for participation in the Program. To facilitate the Education and Outreach Plan, the City will utilize contact information for retail electric customers provided to the City by the electric distribution utility pursuant to Puc 2004.03.

The Education and Outreach Plan (**See Exhibit II**) consists of five components:

i. Initial Outreach and Education: This will be conducted after the selection of a Competitive Supplier and prior to arrival of the customer notification letter. It is intended to promote general awareness of the upcoming Program, minimize any questions generated by the arrival of the customer notification letter and maximize recipients' ability to make an informed choice about their participation in the Program. This effort will include information about the goals of the Program, the basic terms and conditions including renewable energy components, and the opt-out process. This effort will also include posting of the Program's product information for residential and small commercial customers on the Department of Energy's shopping comparison website. Such information will be posted on the website in advance of mailing the Customer Notification Letters.

ii. Customer Notification Letters: In addition to the initial outreach and education initiatives, a notice ("Customer Notification Letter") will be mailed to every retail electric customer. The Program will have two versions of this letter, one for Eligible Customers and one for other customers.

The Customer Notification Letter for Eligible Customers will contain a description of the aggregation program; the implications to the City; the rights and responsibilities that the participants will have under the Program; all details, including all rates, on the products offered by the Program; explain that the customer will be automatically enrolled in the default product unless they choose otherwise and identify the deadline to make such a choice; have instructions for how to not participate (opt out) via web, phone or a pre-addressed envelope and opt-out reply card included with the letter; and instruction for how to enroll in an optional Program product. The opt-out period will last a minimum of 30 days from

the date of mailing of the Customer Notification Letters.

The Customer Notification Letter for other customers will, at a minimum, contain a description of the aggregation program, the implications to the City, and instructions for how to enroll in any of the Program products if desired.

Prior to the mailing of the Customer Notification Letters, the Program will confirm with the Competitive Supplier and the electric distribution utility that the Competitive Supplier is able to use EDI for enrollment of Default Service customers into the Program.

iii. Opt-Out Period Education & Outreach: After the Customer Notification Letters have been sent, the City will continue its education and outreach to afford residents and businesses the opportunity to learn more and find answers to key questions relating to their decision to opt out or enroll in one of the optional products of the Program. This will include, at a minimum, a public information meeting within 15 days of the mailing of the customer notification letter.

iv. Timeline and Preliminary Marketing Plan for Launch: This component identifies the steps the City intends to take in marketing the Program including identification of media and other community resources, examples of education and outreach documents, and an expected timeframe for the outreach effort.

v. Ongoing Outreach & Education: This component describes the expected outreach and education activities following Program launch. Key elements include:

- Program goals and performance, particularly as they relate to progress towards the City's ambitious short- and long- term goals for renewable energy, particularly for 2030 and 2050.
- On-going campaigns to recruit participation into its optional product(s) that contain more renewable energy than required by law ("Opt up campaigns"). Increasing participation in these products will serve the City's goals to expand new renewable energy and increase overall renewable energy use; AND
- Promotion and support of the NHSaves energy efficiency program, and future energy efficiency and weatherization programs

The attached Education and Outreach Plan (**Exhibit II**) describes in detail the City's anticipated outreach efforts, including a timeline.

VI.c. Enroll customers and provide service

i. Enroll Customers: After the conclusion of the opt-out period (i.e. no sooner than 37 days from the date of the postmark of the Customer Notification Letters, which includes 3 days for mailing, 30 days for customer consideration, and an additional 3 days for return of the replay card), the Competitive Supplier will enroll into the Program all retail electric customers on Default Service with the electric distribution utility who did not opt out and any other retail electric customers that have affirmatively requested in writing or through email to be enrolled into the Program. All enrollments and other transactions between the Competitive Supplier and the electric distribution utility will be conducted in compliance with the relevant provisions of New Hampshire Public Utilities Commission regulations, Terms and Conditions for Competitive Suppliers, and the protocols of the New Hampshire Electronic Business Transaction (EBT) standards.

After enrollment of each customer, the Program may receive billing information for each enrolled customer from the electric distribution utility pursuant to Puc 2205.13.

ii. Provide Service: Once customers are enrolled, the Program will provide all-requirements power supply service. The Program will also provide ongoing customer service, maintain the Program website, and process customer enrollments, ongoing opt outs, and customer selections of optional products. The Program will provide Energy Source Disclosure labels to participants as required by RSA 378:49.

Prior to the expiration of the initial ESA, the City intends to solicit a new power supply agreement, as described in **Section XIII. Method of Terminating and Entering Agreements with Other Entities**. If the City elects not to enter into a new power supply agreement, participating customers would return to Default Service as described in **Section XV. Extensions or Termination of Program**.

Retail electric customers that apply for new service with the electric distribution utility (e.g., new customers move into the City or move within the City), they will initially be enrolled in Default Service supply provided by the electric distribution utility. The Program will mail such customers a Customer Notification Letter for Eligible Customers per section IV.b.ii detailing the Plan and an opt-out card. At the end of the opt-out period they will be enrolled in the Program unless they elect to opt-out, per section IV.c.i. New customers also may proactively enroll by contacting the Program directly.

The City will update the information on the Program's products on the Department of Energy's comparison shopping website whenever such information changes.

iii. Annual Report: On an annual basis, the City Manager, or its designee(s) will

report to the City Council on the status of the Community Power Program, including the number of customers enrolled and opting-out, kilowatt-hour usage, customer savings, participation in renewable energy products, and such other information as the City may request. The information for this report will be prepared by the Community Power Consultant, and the Community Power Consultant will assist or lead in presenting to the City Council as desired by the City Manager.

iv. Data Portal: The Community Power Consultant will make available to the City Manager and its designee(s) a secure, password-protected cloud-based data portal that provides the ability to run reports on key Program metrics and performance.

VI.d. Plan for Program evolution

City seeks to continually improve the Program and progress towards its long-term goals. To this end, the Community Power Consultant and City will regularly assess new opportunities such as technologies, services, regulatory policy changes, and more for their applicability to the Program. Community Power Consultant will develop appropriate strategies to integrate these opportunities into the Program. Community Power Consultant will support the City to present new opportunities to the City Council for their consideration and approval, if amendments to the Plan are needed.

VII. Funding

All of the costs of the Program will be funded through the per kilowatt-hour rates established in the ESA. Only Program participants will pay for the costs of the Program, listed below.

The primary cost will be the cost of the Competitive Supplier for the power supply, which will be funded through a per kilowatt-hour power supply rate component. These costs will be established through the competitive solicitation for a supplier.

The administrative costs of the Program will be funded through a per kilowatt-hour administrative rate component that will be paid by the Competitive Supplier to the Community Power Consultant, as specified in the ESA. This rate component will cover the services of the Community Power Consultant, including developing the Community Power Plan, managing the supply procurement, developing and implementing the public education plan, providing customer support, interacting with the electric distribution utility, monitoring the supply contract, and providing ongoing reports.

The City may choose to collect a per kilowatt-hour discretionary energy reserve fund rate component that will be paid by the Competitive Supplier to the City, as specified in the ESA. The City shall deposit and maintain such amounts in an enterprise fund to be used

for the cost of providing energy-related benefits to Program participants and supporting Program goals. Examples of such uses include (1) supporting development of new renewable energy projects, (2) supporting electrification of thermal and transportation uses, and (3) other energy-related programs and services. The City Council shall provide authorization for the use of funds from the discretionary energy reserve fund rate component. The City Manager will determine the appropriate amount of discretionary energy reserve fund rate component to include in each product in each ESA, within a range pre-approved by the City Council.

VIII. Rate Setting and Other Costs to Participants

The Program is offered on an opt-out basis, such that Eligible Customers will be automatically enrolled unless they proactively choose to opt out.

As described above, the Program's per kilowatt-hour rates will include the power supply, administrative, and discretionary energy reserve fund rate components, and applicable taxes pursuant to the ESA. Prices, terms, and conditions may differ among customer classes, which classes will be the same as the Default Service customer classes of the electric distribution utility. The frequency of price changes will be determined through the competitive bid process. The City expects to solicit bids for a number of different contract terms. Prices may change as specified in the winning bid and customers will be notified of price changes through media releases and postings on the Community Power Program website.

Regulatory events, such as new or altered requirements for the Renewable Portfolio Standard, or new taxes may result in a direct, material increase in costs during the term of the ESA. In such cases, the City and the Competitive Supplier will negotiate a potential change in the Program price. At least 30 days prior to the implementation of any such change, the City will notify customers of the change in price by issuing a media release and posting a notice in City Hall and on the Program website. The City shall also notify the NHPUC Consumer Services and External Affairs Division prior to implementation of any change in the Program price related to a regulatory event or new taxes. Such notice shall be provided prior to notifying customers and will include copies of all media releases, postings on the City and Program websites and any other communications the City intends to provide to customers regarding the price change.

The Program affects only the electricity supply charges of the customers. Delivery charges will be unchanged and will continue to be charged by the electric distribution utility in accordance with tariffs approved by the NHPUC.

Participants in the Program will receive one bill from the electric distribution utility that includes both the power supply charge of the Competitive Supplier and the delivery charge of the electric distribution utility. Any applicable taxes will be billed as part of

the Program's power supply charge.

Participants in the Program will be able to opt-out of the Program and transfer to Default Service with the electric distribution utility or to another competitive supplier. Such requests submitted to the Program will be submitted by the Competitive Supplier to the electric distribution utility for processing on the customer's next available regular meter read date. There shall be no penalty or exit fee for such transfer. Customers requesting transfer of supply service upon dates other than on the next available regular meter reading date may be charged an off-cycle meter reading and billing charge if such a service is available from the electric distribution utility.

IX. Net Metering Compensation

In accordance with RSA 362-A:9, II, the Program may determine the terms and conditions for net metering. In order to support the development of distributed energy resources within Keene, the Program will seek to offer net metering terms and conditions - for standard, alternative and group net metering - equal to or better than that provided on Default Service. To this end, the Program will evaluate the net metering terms and conditions offered by competitive suppliers as part of the procurement and bid selection process.

To ensure net metering customers can make a fully informed decision on their participation in the Program, the Program will tailor all education and outreach materials to clearly communicate any and all differences between the net metering value and operation provided by the Program and Default Service.

Additionally, the Program will evaluate how any proposed or implemented changes to the utility metering or billing infrastructure may create new opportunities to enhance the net metering benefits.

X. Electric Assistance Program and other discounts

The New Hampshire Electric Assistance Program (EAP) provides qualifying customers with a discount on their monthly electric bill. The New Hampshire Legislature authorized funding for this statewide program as part of electric utility deregulation. All electric utility ratepayers support the statewide EAP through the System Benefits Charge (SBC) portion of their electric bill.

The EAP for income-eligible customers that may qualify for a discount off their monthly electric bill would continue for participants in the Program. The level of discount depends on household income, household size and electricity usage.

The EAP discount does apply to the Supplier Services portion of an electric bill when a customer chooses an independent supplier for their electricity needs. The participants in the Program who are enrolled in the EAP will receive their discounts by the same method they presently receive their discount. Participation in the Program is independent of enrollment in the EAP and does not impact the EAP discount.

Other discount programs administered by Community Action Programs that address the needs of low-income residents would continue for participants in the Program.

XI. Aggregating Municipalities & Buying Group

Participating in a buying group may offer the potential for the City to expand its buying power for greater economies of scale and to support the City's goal of acting as a regional leader, supporting other municipalities to access the benefits for Community Power. Keene will evaluate opportunities for such a buying group before issuing a bid for competitive supply. See **Section VI.a. Issue an RFP for Power Supply and Select a Competitive Supplier** for details on the implementation of a buying group.

Additionally, the City reserves its right, in accordance with RSA 53-E:6, I, to join with other municipalities or counties for its Community Power Plan and implementing its Community Power Program. Any changes to the Community Power Plan must be reviewed and approved by the City Council.

XII. Promoting Energy Efficiency

In addition to supporting cost-competitive and cleaner electricity, the City seeks to leverage the Community Power Program to help reduce energy use. This will initially take the form of cross-promoting awareness of efficiency programs through the Program's education and outreach. The Program will also evaluate opportunities for more direct support of energy efficiency.

Promotional education will focus on existing energy efficiency and conservation programs, such as New Hampshire's Weatherization Assistance Program for low-income households and the New Hampshire Saves (NHSaves) program, which provides customers with information, incentives and support designed to save energy, reduce costs, and protect our environment statewide. NHSaves is funded by electric and natural gas ratepayers and delivered by Eversource, Liberty Utilities, New Hampshire Electric Cooperative and Unitil to make homes, businesses and towns more sustainable and more comfortable places to live and work, both now and in the future. Through NHSaves customers can receive a Home Energy Assessment. The assessment identifies energy-saving opportunities in the home and provides the customer with an energy report. The report includes information on equipment rebates and no-cost products, as well as access

to 0% financing and a limited time offers, such as up to 100% off approved insulation. The assessment can also include delivery of energy-saving products recommended by the Energy Specialist, such as LED light bulbs, advanced power strips, and thermostats that can be installed right away to start saving money and energy.

If and when additional energy efficiency and conservation programs or initiatives become available, the Program will evaluate how to incorporate them into its promotional outreach and education.

XIII. Method of Entering and Terminating Agreements with Other Entities

The process for entering, modifying, enforcing, and terminating all agreements associated with the Plan will comply with the municipal charter, federal and state law and rules and regulations, and the provisions of the relevant agreement.

The City plans to use the same process described in **Section IV.a.** of this Plan to solicit bids and enter into any subsequent ESAs with the assistance of its then-current Community Power Consultant. Customers will be notified of subsequent ESAs through press releases and public notices. The transfer of customers from the existing supplier to the new supplier will be coordinated with the electric distribution utility using established Electronic Data Interchange (EDI) protocols.

If the City determines that it requires the services of a Community Power Consultant after expiration of the existing agreement with GE/SP, it will evaluate opportunities to solicit a Community Power Consultant individually or as part of a group of municipalities aggregating the electric load of their respective customers. The City will solicit proposals for, and evaluate, potential Community Power Consultants using a competitive procurement process or alternative procedure which the City determines to be in the best interest of its customers and consistent with all applicable local, state and federal laws and regulations.

XIV. Rights and Responsibilities of Program Participants

All participants will have the right to opt out of the Program at any time without charge. They may exercise this right by any of the following: 1) calling the toll-free number of the Competitive Supplier; 2) contacting the electric distribution utility and asking to be returned to Default Service; or 3) enrolling with another competitive supplier.

All participants will have available to them the customer protection provisions of the law and regulations of New Hampshire, including the right to question billing and service quality practices. Customers will be able to ask questions of and register complaints with the City, the Community Power Consultant, the Competitive Supplier, the electric

distribution utility and the NHPUC. As appropriate, the City and the Community Power Consultant will direct customer complaints to the Competitive Supplier, the electric distribution utility or the NHPUC.

Participants will continue to be responsible for paying their bills and for providing access to metering and other equipment necessary to carry out utility operations. Participants are responsible for requesting any exemption from the collection of any applicable taxes and must provide appropriate documentation of such exemption to the Competitive Supplier.

XV. Extensions or Termination of Program

Prior to the end of the term of the initial ESA, the City will solicit bids for a new supply agreement and plans to continue the Program with the same or new competitive supplier.

Although the City is not contemplating a termination date, the Program could be terminated upon the termination or expiration of the ESA without any extension, renewal, or negotiation of a subsequent supply contract, or upon the decision of the City to dissolve the Program effective on the end date of the existing ESA. In the event of termination, customers would return to the Default Service of the electric distribution utility, unless they choose an alternative competitive supplier. The City will notify customers of a planned termination of the Program through media releases and postings on the Program website.

The City will notify the electric distribution utility of the planned termination or extension of the Program in writing. In particular, the City will provide the electric distribution utility notice: (1) 90 days prior to a planned termination of the Program; (2) 90 days prior to the end of the anticipated term of the ESA; and (3) four business-days after the successful negotiation of a new ESA. The City will also provide written notice to the NHPUC 90 days prior to a planned termination, which notice shall include copies of all media releases, City Hall and website postings and other communications the City intends to provide customers regarding the termination of the Program and the return of participants to Default Service. The City will also provide written notice 90 days prior to a planned termination to the Office of the Consumer Advocate and the Department of Energy.

In the event of unplanned termination of the Program because that the Program can no longer provide service to its customers, the Program shall provide immediate written notice to the NHPUC describing the market suspension or other event that caused the Program to no longer be able to provide service, the effective time of the inability to provide service, and the notice provided to customers of the timing and consequences of the cessation of the Program's service. The Program shall file a copy of such notice at the same time to the office of the Office of the Consumer Advocate, the Department of

Energy, and the electric distribution utility.

In the event of the termination of the Program, it is the responsibility and requirement of the Competitive Supplier to return the customers to Default Service of the electric distribution utility in accordance with the then applicable EDI rules and procedures.

In the event of the termination of the Program, the balance of any funds accrued by the Program's discretionary energy reserve fund, if any, would be available for distribution or application as directed by the City Council and in accordance with any applicable law and regulation.

XVI. Planned Schedule

The planned schedule below is presented for illustrative purposes. The final schedule will be established once the Program has received all necessary approvals and will ensure compliance with the all required notification timelines prior to Program commencement.

Day	Action or Event
1	Issue RFP for Competitive Supplier
31	ESA executed between City and Competitive Supplier. Program provides required notifications to NHPUC, Department of Energy, Office of Consumer Advocate, and electric distribution utility.
32	Competitive Supplier receives retail electric customer mailing data and data needed for Eligible Customer enrollment in Program
48	Competitive Supplier, at its expense, mails Customer Notification Letters to all retail electric customers, including identifying the return date by which the reply card envelopes for Eligible Customers must be mailed and postmarked
51	Retail electric customers receive Customer Notification Letter in the mail
81	Return date by which Eligible Customers deciding to opt-out must mail a reply card in pre-paid envelope to Competitive Supplier.
85	Competitive Supplier removes all Eligible Customers who opt out from the Eligible Customer list
85	Competitive Supplier sends "supplier enrolls customer" EDI for all Eligible Customers that did not opt-out and any other customers that affirmatively elected to opt-in to the Program.

90

Service begins as of each customer's next meter read date

XVII. Conclusion

Keene's Community Power Program meets all of the requirements of the Community Power law, including providing universal access, a reliable power supply and treating all customer classes equitably. The City looks forward to launching the Program and pursuing the benefits of a competitive power supply, renewable energy, and electricity choice for its retail electric customers.

Exhibit I - Historical Overview

List of Revisions

[Adopted by City Council on May 6, 2021](#)

[Amended July 31, 2022](#)

[Approved by New Hampshire Public Utilities Commission October 3, 2022](#)

[Adopted by City Council on November 3, 2022](#)

[Amended February 10, 2025](#)

[Adopted by City Council on March 20, 2025](#)

[Amended August 5, 2026](#)

[Formally adopted by City Council on TBD](#)

1. Creation of Community Power Committee

On June 18, 2020 the Keene City Council approved the formation of an Ad-Hoc Community Power Committee (CPC). From City Council Minutes June 18, 2020:

FOP REPORT - COMMUNITY POWER PROGRAM & AD HOC COMMUNITY POWER COMMITTEE - ASSISTANT CITY MANAGER/COMMUNITY DEVELOPMENT DIRECTOR

The Mayor brought forward the Finance, Organization and Personnel Committee report recommending that the Mayor be requested to constitute an ad-hoc Community Power Committee to develop a Community Power Plan for submission to the City Council in accordance with RSA 53-E. A motion by Councilor Powers to carry out the intent of the report was duly seconded by Councilor Hooper. The motion passed on a roll call vote with 15 Councilors present and voting in favor.

APPOINTMENT OF AN AD HOC COMMUNITY POWER COMMITTEE

The Mayor appointed an ad hoc Community Power Committee that would be charged with developing a community power plan for the citizens of Keene. The appointments from the Mayor included: Dr. Ann Shedd, Peter Hansel, Paul Roth, Jeffrey Titus, Michael Giacomo and Daniel Belluscio. A motion by Councilor Powers to confirm the appointments was duly seconded by Councilor Bosley. On roll call vote, 15 Councilors were present and voting in favor. The appointments were confirmed.

2. Creation of a Draft Plan with public hearings

The Committee, supported by City Staff and the Community Power Consultant,

held two public information sessions on December 8, 2020 to promote awareness of the development of a Community Power Plan and to begin gathering input. Also on December 8, 2020, the Committee released a community survey open for approximately one month through January 7, 2021. The survey was available online and via paper in the Monadnock Shopper News. The online survey and the City's website, KeeneEnergyPlan.com also hosted two educational videos about Community Power. KeeneEnergyPlan.com has hosted additional educational resources about Community Power, including an FAQ page, podcast and interviews with municipal leaders from active community power (also known as municipal aggregation) programs, such as Medford, Massachusetts.

The survey received 126 responses, 97 online and 29 in paper via the Monadnock Shopper News. Key survey findings:

- 86% of respondents currently receive supply from Eversource Default Service. Such customers would be eligible for automatic enrollment in the Program.
- The survey had a well-distributed diversity of household income groups and age, as shown below:

- Respondents identified a range of benefits they are interested in with

Community Power:

- 92% of respondents were interested in including more renewable energy in their electricity. Of those interested, roughly half (45%) sought extra renewable energy if they could pay about the same they pay today. The other half (55%) was willing to pay a little or a lot more for extra renewable energy.

- When analyzing preferences for renewable energy and cost by household income, a similar pattern remains for each income group.

Those households under \$50k were more likely than other income groups to want no extra renewable energy; however, 83% of the income group was still interested in more renewable energy. Of those interested, 50% sought extra renewable energy if they could pay about the same they pay today. The other 33% was willing to pay a little or a lot more for extra renewable energy.

Do you want extra renewable energy, by household income?

- Nearly three-quarters (73%) of participants had not performed an energy audit, and the percentages were nearly identical across household income groups. There appears to be widespread opportunity for energy efficiency improvements, with nearly three-quarters (71%) reporting that they keep their thermostat lower than they would like in winter and over half (51%) reporting their home is drafty or heating costs are too high.

Energy efficiency

Survey Conclusions:

The majority of participants in Community Power programs typically remain in the default product rather than choosing any of the program optional products. Given the strong support for both renewable energy and cost parity demonstrated in the survey responses, it suggests that Keene would be well-served by a default

product designed with the goals of 1) achieving cost parity or savings compared to Eversource Default Service and 2) including some extra renewable energy.

Additionally, the survey highlighted that, for those that can afford it, the program should offer options with substantially more renewable energy for a price premium.

Although less than 8% of survey responses were not interested in extra renewable energy, it could be beneficial to have an optional product that would meet their needs by providing a lower-cost option with no extra renewable energy, particularly for those households in the lowest income bracket.

There is substantial opportunity for energy audits and efficiency improvements, suggesting support for energy efficiency by the Program would be valuable.

Respondents also cited an interest in local jobs, which the Program can support through demand for additional local renewable energy and by promoting greater participation in energy efficiency programs. Regional cooperation, particularly with neighboring municipalities, would amplify this impact as well.

Draft Plan: Public Hearings & Comments

The Committee held two additional public meetings on January 26, 2021 (12:00 pm and 6:30 pm) to present the survey findings, discuss how the results would be incorporated into the draft Community Power Plan, and provide an overview of other details to expect in the Community Power Plan.

On February 5, 2021 the draft Community Power Plan was posted publicly to the program website, [KeeneCommunityPower.com](https://www.keenecommunitypower.com). During the Committee's meeting on February 12, 2021, the Committee announced the availability of the draft Community Power Plan, invited comment and scheduled two public hearings for March 30, 2021 (12:00 pm and 6:30 pm). The Committee and the City promoted awareness of the draft Plan through diverse means including a formal hearing notice in the newspaper, press releases, postings on the City website and social media, and email outreach to the City's Community Power email list. The public was encouraged to submit comments ahead of the public hearings using the online comment form on the program's website, [KeeneCommunityPower.com](https://www.keenecommunitypower.com), and email, phone or written comment to the City's Community Development department.

The Committee received comments ahead of and during the public hearings. All public comment is available in the Committee's meeting packet for April 8, 2021.

3. Approval of Plan by Community Power Committee

The Committee discussed public comments and potential changes to the Community Power Plan during their Committee meeting on April 2, 2021. Additional public comment was provided during the meeting, and the Committee determined to reconvene on April 8, 2021 (see the Committee's meeting packet for April 8, 2021 for additional comment received).

In response to some of the public comments, the Committee revised the plan as follows:

- Adjusted the language describing the likely sources of additional renewable energy in the City's first supply contract to make it clear that local renewable energy generated within the "greater Monadnock region" could also be included, in addition to NH Class I renewable energy.
- Revised the procurement language to clearly allow for the procurement of power and Renewable Energy Credits (RECs) from the same facility (also known as "bundled") or purchase only one or the other from a facility (also known as "unbundled").
- Revised the procurement language to allow for the selection of multiple suppliers (for example, one for residential and small commercial and one for large industrial).
- Modified language throughout the plan to clarify what is meant by the term "local" in different contexts (e.g. "renewables that are on the ISO-New England electricity grid," or "within or as close as possible to Keene in New Hampshire").

The revised plan, including a red-line and clean version dated April 5, 2021, was included in the Committee's meeting packet for the meeting on April 8, 2021. During the meeting, the Committee discussed the revisions. The Committee then unanimously voted to approve the plan and recommend it to the City Council for adoption.

Subsequent to the meeting, on April 8, 2021, summary detail of the public hearings, public comment, Committee's deliberation and vote was added to the Historical Overview.

4. Adoption of Plan by City Council

At the City Council meeting on April 15, 2021 the Community Power Committee's report, which unanimously approved the City of Keene Community Power Plan and recommended adoption to the City Council, was read. The report was referred to the Finance, Organization & Personnel Committee (FOP). The FOP Committee met on April 22, 2021 to review the Plan. Representatives from City staff, the Community Power Committee and the Community Power Consultant presented to the FOP Committee, and following questions and discussion, the FOP Committee unanimously

voted to recommend adoption of the Plan. At the City Council meeting on May 6, 2021, the FOP Committee's recommendation was reported to the City Council, and the Council voted unanimously to adopt the Plan.

Subsequent to the meeting, on May 10, 2021, summary detail of the City Council review and adoption process was added to the Historical Overview.

5. Revision of Plan

The City amended the Plan in mid-March 2022 to better address questions of data security based on feedback provided by the Public Utilities Commission in orders on other Community Power plans. The City submitted its Plan to the Commission in April 2022 (DE 22-022), and it received an order in June 2022 which encouraged the City to re-submit the Plan closer to or after the completion of the rulemaking process for Community Power.

On July 27, 2022, the Commission voted to approve Community Power rules. The City further amended the Plan [on July 31, 2022](#) to appropriately reference those rules.

6. Submission of Revised Plan to Public Utilities Commission

The City submitted the revised Plan to the Public Utilities Commission (PUC) on August 3, 2022 under the existing docket number (DE 22-022) and the PUC approved the revised Plan on October 3, 2022.

7. Adoption of Revised Plan by City Council

The City Council adopted the revised Plan at their meeting on November 3, 2022. Subsequent to the meeting, summary detail of the vote (#7) and the submission to the PUC (#6) were added to this Exhibit I.

8. Adoption of Revised Plan by City Council

The City amended the plan in February 2025 to enable it to collect additional revenue in its rates to support energy-related projects that would benefit Program participants. The City Council adopted the revised Plan at their meeting on March 20, 2025.

9. Adoption of Revised Plan by City Council

[The City amended the Plan in August 2026 to enable different default products for customers on the New Hampshire Electric Assistance Program \(EAP\). The City Council adopted the revised Plan at their meeting on TBD.](#)

Exhibit II - Education & Outreach Plan

1. Initial Outreach and Education

The initial outreach and education will provide a description of the Program for retail electric customers and will be conducted via traditional print and TV channels, social media, a dedicated website, public presentations and personal communications to inform retail electric customers about the Program and will include a toll-free number. This effort will provide specific information about the Program and increase public awareness of the goals of the Program and the upcoming opt-out notification process.

If any Program materials were to reference cost savings for any part of the Program, a notice would be included which states that the City cannot guarantee that the Program will provide customers with prices lower than the distribution utility's Default Service rate over the full term of any supply contract entered into by the City.

1.1 Media Outreach

Prior to the launch of the Program, the City will initiate media outreach that may include the use of local cable television shows, newspapers and social media to provide greater public education and to describe the Program, the opt-out process, the website, and the toll-free telephone number. Outreach may also include public service announcements (PSAs), scheduling interviews of Program spokespersons with local media outlets, and securing a positive media presence.

A news release may be distributed to help achieve the aforementioned goals. Follow-up news releases may be used to update the media on the status of the progress of the Program.

1.2 Notices and Public Postings

Brochures/flyers will be distributed in City offices describing the Program, the opt-out process and the toll-free telephone number in order to further reinforce the Program's details. Brochures/flyers may be placed in key gathering areas or buildings (e.g. library, Senior Center, etc.) which will create the necessary repetition of messages required to motivate customer action and build awareness and understanding.

1.3 Customer Service Center

The Program will maintain a toll-free telephone number to address retail electric customers' questions regarding the Program, deregulation, the opt-out process, price information and other issues such customers may raise.

1.4 Website

All information regarding the Program will be posted on the Program website, which is linked to the website of the City: <https://keenecommunitypower.com/>. The Program website will have links to the website of the electric distribution utility, the New Hampshire Public Utilities Commission (NHPUC), Department of Energy, and the Competitive Supplier.

1.5 Public Presentations

The Program will provide presentations to municipal officials and to interested community groups.

1.6 Outreach to Persons with Limited English Proficiency or Disabilities

The Program plans to make printed materials available in English. To accommodate limited English-speaking residents, the City will provide a translation option on its Program website (which contains all details on the Program including a description of the Program and its products, the implications to the City, and the rights and responsibilities that the participants will have under the Program) that will translate any written materials on the website into over 100 different languages. The website also will be designed with the goal of being compliant with the Americans with Disabilities Act (“ADA”) and will include formats that allow the content to be read out loud by computer assistive technology. Outreach efforts will be communicated in print and audio formats to provide access to both the hearing and visually impaired.

2. Customer Notification Letter

The Customer Notification Letters will be sent via standard mail to the billing address of each retail electric customer per section IV.b.II of the Plan. The Program will have two versions of this letter, one for Eligible Customers and one for other customers. The Competitive Supplier shall bear all expenses regarding the Customer Notification Letters.

2.1 Customer Notification Letter for Eligible Customers

Per section III.b of the Plan, all retail electric customers receiving Default Service supply from the electric distribution utility will be eligible for automatic enrollment in the Program (“Eligible Customers”). The notification envelope will be designed to appear as an official City communication and it will be clearly marked as containing time sensitive information related to the Program. The notification will contain a letter describing the Program.

The letter will inform Eligible Customers:

- a) about the Program, implications to the City and provide information regarding participation and participants' responsibilities and rights;
- b) that they have the right to opt-out of the Program without penalty;
- c) of all charges, prominently stated, with a comparison of price and primary terms of the Competitive Supplier and the current Default Service offering;
- d) that any savings under the Program compared to Default Service cannot be guaranteed because the Default Service rate is subject to changes
- e) about the opt-out process; and
- f) in languages other than English for appropriate customer groups (i.e. toll-free telephone number).

The letter will also contain an opt-out reply card with a simple check off and signature line for Eligible Customers who do not wish to participate. The envelope will be pre-stamped for return of the opt-out reply card in order to protect customer privacy.

Eligible Customers will have 33 days from the date of the mailing to mail back the opt-out card in a pre-addressed postage-paid envelope and the customer notification shall identify the specific date by which the envelopes containing the opt-out card must be postmarked. Automatic enrollment of customers will not start until three days after the date specified for the postmark of the return envelopes to allow for receipt of the opt-out cards prior to the start of automatic enrollments. New Eligible Customers will be enrolled in the Program in accordance with applicable Local Distributor Company rules. Upon initiation of service, these new Eligible Customers will receive the same customer information as all other Eligible Customers.

2.2. Customer Notification Letter for Other Customers

The Customer Notification Letter for other customers will, at a minimum, contain a description of the aggregation program, the implications to the City, and instructions for how to enroll in any of the Program products if desired.

3. Opt-Out Period Education & Outreach

After the Customer Notification Letters have been sent, City will continue its education and outreach to afford residents and businesses the opportunity to learn more and find answers to key questions relating to their decision to opt out or enroll in one of the optional products of the Program. This process will include, at a minimum, a public information meeting within 15 days of the mailing of the customer notification letter. It will also include a similar range of outreach activities as

enumerated in section 1.1 to 1.6.

4. Timeline and Preliminary Marketing Plan for Launch

The timeline and preliminary marketing plan identifies the steps the City may take to inform the community about the Program, as described in Sections 1 through 3 of Exhibit II. The schedule is designed to work towards the estimated date when the Customer Notification Letter is scheduled to arrive in customer mailboxes. The dates may be adjusted to ensure compliance with the minimum written notification timelines for the date of commencement of service to the NHPUC, the Office of Consumer Advocate, the Department of Energy Puc 2205.16.

The costs and implementation will be handled by the Community Power Consultant, under the direction of the City.

From estimated date Customer Notification Letter arrives in customer mailboxes		
Action	Days before	Days after
A. Update Program & Shopping Comparison Websites	15	Ongoing
B. Work with local media resources	15	30
C. Active social media outreach	15	30
D. Initial person presentations	15	30
E. Distribute marketing materials	15	30
F. Customer help line	15	Ongoing
G. Mail postcard to all Eligible Customers	5	-
H. Customer Notification Letters arrives	0	0

A. Program & Shopping Comparison Website Update:

Timeframe: 15 days before the estimated date that the customer notification letter arrives in customer mailboxes, then maintained on an ongoing basis.

The Program's website is <https://keenecommunitypower.com/>. After executing an ESA, the Program will update this website with a description of the Program and its

products, the implications to the City, and the rights and responsibilities that the participants will have under the Program.

The shopping comparison website is maintained by the Department of Energy to enable consumers to shop for electricity supply products. The Program will post its product information for residential and small commercial customers on the shopping comparison website. Such information will be posted on the website in advance of mailing the Customer Notification Letters.

B. Work with local media resources:

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives.

Area Newspapers:

The City will work with area print and online newspapers to disseminate accurate and timely information about the Program. As part of this targeted outreach to these papers, the City may seek a meeting with the editorial board to establish a good foundation for continued dialogue over the course of the contract. Other newspaper outlets may include other local publications.

- These papers include: Keene Sentinel, Monadnock Shopper News, and the New Hampshire Union Leader

Local Public Access Television:

The City intends to work with Cheshire TV channels for public (1301) and government (1302) access. City can record interviews about the Program and PSAs for upcoming meetings.

Other Television and Radio Stations

Develop press releases to send to other TV stations and radio stations.

- TV stations include WMUR (ABC, MANCHESTER, NH) Channel 9; WUTF (INDEPENDENT, WORCESTER, MA) Channel 27; WVTA (PBS, WINDSOR, VT) Channel 41; WWJE (INDEPENDENT, DERRY, NH) Channel 50; WEKW (PBS, KEENE, NH) Channel 52; WNEU (NBC, MERRIMACK, NH) Channel 60;
- Radio stations include WVBA (88.9 FM) Brattleboro, VT; WEVO (89.1 FM) Concord, NH; WEVN (90.7 FM) Keene, NH; WEEY (93.5 FM) Swanzey, NH; WSNI (97.7 FM) Keene, NH; WINQ (103.1 FM) Keene, NH; WKNE

(103.7 FM) Keene, NH; WYRY (105.5 FM) Keene, NH; WCNL (1010 AM) Newport, NH; WKBK (1290 AM) Keene, NH; WTSA (1450 AM) Brattleboro, VT

Municipal Staff Interviews

Develop Q&A Scripts and prepare municipal staff or volunteers for interviews.

C. Active Social Media Outreach

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives.

Boost all traditional media coverage on social media platforms, with the goal of driving traffic to the dedicated website of the City.

In concert with the communication leads of the City, develop a campaign of planned tweets and Facebook posts, timed to coincide with important milestones in order to keep ratepayers informed, particularly those that may not interact with traditional media on a regular basis. Draft content and graphics to accompany the posts, to be made by City staff.

- These accounts may include: City of Keene (Instagram, Facebook); City Manager (Twitter); Keene Community Development (Instagram, Facebook & Twitter) and Keene Public Library (Instagram, Facebook & Twitter).

Monitor various channels such as Facebook and Instagram for relevant conversations and questions about the Program. Draft responses to comments and questions and utilize social media as a critical tool in engaging with members of the community.

- These accounts may include: “Downtown Keene” Facebook page (@downtownkeene); the “Keene, NH” Facebook group (5.5k members); and “Keene NH Community Forum” Facebook group (1.5k members)

Identify key social media influencers in the City, including lawmakers, advocates and reporters. Develop a spreadsheet of the social media handles/accounts and reach out to them to keep them informed about the Program.

D. In Person Presentations

Timeframe: 15 days before to 30 days after the estimated date that the customer notification letter arrives. This will include, as required in RSA 53:E-7, a public information meeting within 15 days of the mailing of the customer notification letter.

Local Groups

Connect with local groups and associations to see if representatives of the City can participate in an upcoming meeting or offer to host a dedicated event. Seek their assistance in identifying how to best connect with customers with limited-English capabilities or disabilities that may prevent them from accessing Program information.

- Example groups include: Neighborhood associations, Social service agencies, Business Focus Group, Rotary, Kiwanis, Lions, Chamber, Clean Energy team, Keene Young Professionals, Downtown Group, Board of Realtors, Keene Senior Center, Keene Off-campus Housing (landlords and tenants), Keene State College English as a Second Language (ESL) classes, CALL Program (Cheshire Academy for Lifelong Learning).

Reaching the business community will be important. Presenting to the Chamber of Commerce can start this dialogue and lead to additional outreach to and connection with businesses.

Council Meetings

Present or provide materials for the Council meetings and any constituent meeting they may have.

E. Distribute marketing materials

Timeframe: 15 days before to 30 days after the estimated date that the customer Notification Letter arrives.

Many groups may have a natural interest in promoting awareness about the Program and can be provided with electronic and hard-copy materials with reference information for the Program.

Distribute to key locations such as Municipal Offices and Public Library.

F. Customer Help Line

Timeframe: 15 days before the estimated date that the customer notification letter arrives and ongoing thereafter.

Establish customer helplines with the Competitive Supplier and Community Power Consultant to answer customer inquiries.

G. Mail Postcard to all Eligible Customers

Timeframe: 5 days before the estimated date that the customer notification letter arrives.

Post Card

Send out to Eligible Customers prior to Customer Notification Letter. Establishes that there is a community-sponsored Program and increases the likelihood that recipient engages with the more detailed Customer Notification Letter.

H. Customer Notification Letters arrive

Sent to all retail electric customers. See section 2 above for details.

5. Ongoing Outreach and Education

The City intends to continue outreach and education for customers after enrollment in the Program. The costs and implementation will be handled by the Community Power Consultant, under the direction of the City. These efforts will include:

- **Program impact:** Key metrics relating to cost performance, renewable energy purchases and Program enrollment. Particularly as the Program accomplishments relate to progress towards the City's ambitious short- and long- term goals for renewable energy and greenhouse gas emission reduction. This will also include the Energy Source Disclosure labels for the electricity supply;
- **Opt up campaigns:** On-going campaigns to recruit participation into its optional product(s) that contain more renewable energy than required by law ("Opt up campaigns"). Increasing participation in these products will serve the City's goals to expand new renewable energy and reduce greenhouse gas emissions;
- **Customer awareness:** Rights and procedures for Program participants; contact information for customer inquiries, responses to frequently asked questions, and details regarding the Program's electric supply and renewable attributes.
- **Public input:** As the Program considers changes to further its progress toward a 100% renewable future and other goals, City will manage outreach to solicit input and feedback from the community.
- **Program changes and evolution:** Any changes in offerings and prices, which will be posted on the Program website that is linked to the website of the City.

The Program will utilize similar mediums for on-going education and outreach as for the initial launch education and outreach, including but not limited to: social media, traditional media, in-person meetings and presentations, outreach to local groups, video, and mail.

Translation of all materials will be provided as necessary to reach communities with limited English proficiency.

Exhibit III - Data Protection Plan

I. Introduction

The City of Keene (the “Municipality”) is developing a Community Power program (the “Program”), pursuant to RSA 53-E. A municipality that implements such a program is known as an aggregator (“Aggregator”). RSA 363:38 and PUC 2004.19 require that service providers, including Aggregators, protect individual and confidential customer data (“Individual Customer Data”). Individual Customer Data, as defined in RSA 363:38 and expanded in PUC 2004.19, means information that is collected as part of providing electric services to a customer that can identify, singly or in combination, that specific customer, and includes the customer name, address, and account number and the quantity, characteristics, or time of consumption by the customer, and also includes specific customer payment, financial, banking, and credit information. Further, Aggregators must only use Individual Customer Data for the Program’s primary purpose, which may include 1) providing or billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) researching, developing and implementing new rate structures or demand response, customer assistance, energy management or energy efficiency programs. The Municipality’s [Community Power Consultant](#) ~~has aggregation consultants, Good Energy and Standard Power, have~~ developed this Data Protection Plan to ensure that Individual Customer Data obtained as part of operation of the Program will be protected from disclosure and/or inappropriate use.

II. Elements of the Plan

1. Access to Customer Data

As part of the Program, [the Community Power Consultant](#) ~~Good Energy, Standard Power,~~ local designees of the Municipality, and competitive electricity suppliers (“Suppliers”) selected to provide electricity for the Program (collectively, “Data Administrators”) will receive access to certain information on file with a customer’s local distribution company (“LDC” or “electric distribution utility”), including, among other things, the customer’s name, mailing address, and energy usage history (“Customer Data”). In particular, depending on the status of implementation of the Program, LDC’s may provide four types of Customer Data to Data Administrators: a) aggregated customer data, b) eligible customer data, c) retail electric customer contact information, and d) enrolled customer information. Each type of Customer Data is described more fully below.

- a. Aggregated Customer Data – contains certain information for all electric customers within a municipality, aggregated by rate class or other grouping. This may include data such as the number of customers by rate class, counts of customers participating in net energy metering by rate class, counts of customers participating in electric assistance program by rate class, the aggregated energy (kWh) for electricity consumption by month for the past 12 months or more by rate class, and revenue, receipts and past-due accounts receivable.
- b. Eligible Customer Data – contains certain information for each electricity customer currently receiving utility-provided default service within a municipality. This may include data such as capacity tags for current, prior and next power years, energy (kWh) for electricity consumption for the past 12 months or more, meter reading cycle, whether customer net meters and under which terms, and group net metering data including whether customer is a group net metering host or member of a net metering group, whether a group net metering customer-generator operates as a low-moderate income community solar project, the size of any such net metered generation and the year and month it was placed into service.
- c. Retail Electric Customer Contact Information – comprises certain customer contact information for the provision of Program communications, such as Customer Notification Letters to retail electric customers. This may include such data as the customer of record's name, mailing address, account number, meter number, rate class, and email address.
- d. Enrolled Customer Data – contains certain information for all individual customers who elected not to opt-out of the Program during the opt-out period. This may include such data as Name of customer and customer contact, Mailing address, Service address, Account number and related meter numbers, Name key, Contact information such as phone numbers, email address, Billing account number, Preferred billing and communication method, Billing cycle, Meter read date or cycle, Form or type of meter reading, Capacity tag information for past two years, current power year and forecasted next power year, Most recent 24 months of usage data, Current and historic status of net metering, distributed generation, Preferred billing and communication method, payment plans and electric assistance program participation, and Rate class.

2. Data Security

All Customer Data that is not anonymized (i.e. presented or aggregated in such a way that removes information that can be used to identify the individual customer that it

pertains to, such that it does not constitute individual customer data as defined by RSA 363:37, I or PUC 2002.09) shall be considered Individual Customer Data.

Data Administrators will utilize industry standard physical, technical, and administrative controls and procedures to safeguard Individual Customer Data collected as part of the Program and to prevent unauthorized or accidental access, destruction, loss, alteration, or disclosure of, to protect against anticipated threats or hazards to the security, confidentiality, or integrity of, and to permit only the appropriate use of, such customer information.

To protect the confidentiality, integrity, and availability of Individual Customer Data, Data Administrators will utilize a variety of industry standard physical and logical access controls, firewalls, password protections, intrusion detection/prevention systems, network and database monitoring, and backup systems. These systems will be designed to cover all networks, servers, computers, notebooks, laptops, PDAs, mobile phones, or other devices that contain Individual Customer Data, or through which Individual Customer Data is made available.

Data Administrators will limit access to Individual Customer Data to those persons and entities having a specific business purpose for maintaining and processing such information. Those granted access to Individual Customer Data will be trained on their responsibilities to protect the confidentiality, integrity, and availability of such information.

Data Administrators will work cooperatively with the LDC(s), as necessary, to implement this Data Protection Plan, and will at a minimum, implement the following actions:

- a. Conduct a risk assessment to identify and assess reasonably foreseeable internal and external risks to the security, confidentiality, and integrity of electronic, paper, and other records containing Individual Customer Data and evaluate and improve, where necessary, the effectiveness of their safeguards for limiting those internal and external risks;
- b. Timely notify the LDC(s) of any important modifications of this Data Protection Plan within a reasonable amount of time;
- c. Review and, as appropriate, revise this Data Protection Plan: (i) at least annually or whenever there is a material change in their business practices that may reasonably affect the security or integrity of Customer Data; (ii) in accordance with prevailing industry practices and applicable law; and (iii) as reasonably requested by the LDC(s). If the Data Administrators modify this Data Protection Plan following such a review, the Data Administrators will promptly notify the LDC(s) of such modifications and will provide the

modifications to the LDC(s) in writing upon a LDC's request. The Data Administrators will at no time alter or modify this Data Protection Plan in such a way that will weaken or compromise the confidentiality, security, or integrity of Individual Customer Data;

- d. Maintain and enforce this Data Protection Plan in all locations where Individual Customer Data is processed by the Data Administrators;
- e. Conduct security testing using a third party to provide monitoring penetration and intrusion testing with respect to Data Administrators systems and promptly provide a copy of the results to the LDC(s), provided that the third party may redact IP addresses and other client names and information;
- f. Provide annual security awareness training to all individuals having access to Individual Customer Data and maintain a record of such training; and
- g. Implement a standard process for identifying, assessing, and mitigating security risks.

3. Confidentiality

Data Administrators will not sell Individual Customer Data to others unless such sale is specifically authorized by the customer, or is required by law or court order. Data Administrators will not share, disclose, or provide Individual Customer Data to others, including their affiliates, unless such disclosure, or provision is required to operate the Program (i.e., the Program's "primary purpose", per RSA 363:38), is specifically authorized by the customer, or is required by law or court order. If Data Administrators request customer authorization to disclose Individual Customer Data, Data Administrators will first describe to the customer the information they intend to release and provide details concerning the recipient of such information.

Data Administrators will hold all Customer Data in strict confidence and except as otherwise needed for provision of the Program, required by law, or permitted as below, (a) not disclose Individual Customer Data to any other person or entity (including but not limited to Suppliers, subcontractors, and affiliates or members of [the Community Power Consultant Good Energy and Standard Power](#)); (b) not process Individual Customer Data outside of the United States; (c) not process Individual Customer Data other than in connection with the Program; (d) not process Individual Customer Data for any marketing purposes other than in connection with the Program; (e) limit reproduction of Individual Customer Data to the extent required for the Program; (f) store Individual Customer Data in a secure fashion at a secure location in the United States that is not accessible to any person or entity not authorized to receive the Individual Customer Data; and (g) otherwise use at least the same degree of care to avoid publication or dissemination of the Individual Customer Data as Data Administrators employ (or would employ) with respect to their own confidential

information that they do not (or would not) desire to have published or disseminated, but in no event less than reasonable care.

4. Disclosure of Individual Customer Data

Notwithstanding the provisions of Section 3 above, the Data Administrators may disclose Individual Customer Data to their representatives who have a legitimate need to know or use such Individual Customer Data for the sole and limited purposes of administering and/or conducting the Program. Such representatives will first be advised of the sensitive and confidential nature of such Individual Customer Data and agree to comply with the provisions of this Data Protection Plan. Pursuant to PUC 200.19, Data Administrators may also provide Individual Customer Data to third parties for the purposes of 1) billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) implementing demand response, customer assistance, energy management or energy efficiency programs. Any such third parties will be required by contract to comply with the provisions of this Data Protection Plan.

In the event that Data Administrators or any of their representatives receive notice that they have, will, or may become compelled, pursuant to applicable law or regulation or legal process, to disclose any Individual Customer Data (whether by receipt of oral questions, interrogatories, requests for information or documents in legal proceedings, subpoenas, civil investigative demands, other similar processes or otherwise), Data Administrators will, except to the extent prohibited by law, immediately notify the LDC(s), orally and in writing, of the pending or threatened compulsion. To the extent lawfully allowable, the LDC(s) will have the right to consult with the Data Administrators and the parties will cooperate, in advance of any disclosure, to undertake any lawfully permissible steps to reduce and/or minimize the extent of Individual Customer Data that must be disclosed. The LDC(s) will also have the right to seek an appropriate protective order or other remedy reducing and/or minimizing the extent of Individual Customer Data that must be disclosed.

Data Administrators and their representatives will disclose only such Individual Customer Data which they are advised by legal counsel that they are legally required to disclose in order to comply with such applicable law or regulation or legal process (as such may be affected by any protective order or other remedy obtained by LDC) and Data Administrators and their representatives will use all reasonable efforts to ensure that all Individual Customer Data that is so disclosed will be accorded confidential treatment.

5. Return/Destruction of Individual Customer Data

Upon the expiration of the Program, or as otherwise required by law or Commission order, the Data Administrators will destroy all copies of any Individual Customer Data

(including any and all extracts, compilations, studies or other documents based upon, derived from or containing Individual Customer Data) within their or their representatives' possession (including destroying Individual Customer Data from all systems, records, archives and backups), and all subsequent use and processing of the Individual Customer Data by the Data Administrators and their representatives will cease.

Notwithstanding the foregoing, the Data Administrators and their representatives will not erase Individual Customer Data contained in an archived computer system backup maintained in accordance with their respective security or disaster recovery procedures. The Data Administrators will not provide access to or recovery of Individual Customer Data from such computer backup system and will keep all such Individual Customer Data confidential in accordance with this Data Protection Plan.

6. Data Security Incidents

The Data Administrators are responsible for any and all security incidents involving Individual Customer Data that is processed as part of the Program. The Data Administrators will notify the LDC(s) in writing immediately (and in any event within twenty-four (24) hours) whenever the Data Administrators reasonably believe that there has been a data security incident involving Individual Customer Data. After providing such notice, the Data Administrators will investigate the incident, and immediately take all necessary steps to eliminate or contain any exposure of Individual Customer Data. The Data Administrators will provide the LDC(s) with reasonable assistance and cooperation in the furtherance of any correction, remediation, or investigation of any such data security incidents and/or the mitigation of any damage, including any notification required by law or that LDC(s) may determine appropriate to send to individuals impacted or potentially impacted by such data security incident(s), and/or the provision of any credit reporting service required by law or that LDC(s) deems appropriate to provide to such individuals.

Unless required by law, the Data Administrators will not notify any individual or any third party other than law enforcement of any potential data security incidents involving Individual Customer Data without first consulting with, and obtaining the permission of, the LDC(s). Within 30 days of identifying or being informed of a data security incident, the Data Administrators will develop and execute a plan, with the cooperation of the LDC(s), which reduces the likelihood of a recurrence of such data security incident(s).

7. Additional Protections

The Data Administrators will comply with all applicable privacy and security laws to which it is subject, including this Data Protection Plan.

The Data Administrators will safely secure and/or encrypt all Individual Customer Data during storage and transmission.

The Data Administrators will have in place appropriate and reasonable processes and systems, including this Data Protection Plan, to protect the security of Individual Customer Data and to prevent a data security incident, including, without limitation, a breach resulting from or arising out of the Data Administrators' internal use, processing, or other transmission of Individual Customer Data, whether between or among their representatives, subsidiaries and affiliates, or any other person or entity acting on behalf of the Data Administrators.

The Data Administrators will work cooperatively with the LDC(s) to implement this Data Protection Plan, including: establishing policies and procedures to provide reasonable and prompt assistance to LDC(s) in responding to any and all requests, complaints, or other communications received from any individual who is or may be the subject of a data security incident involving Customer Data to the extent such request, complaint or other communication relates to the Data Administrators' processing of such individual's Individual Customer Data; and establishing policies and procedures to provide all reasonable and prompt assistance to LDC(s) in responding to any and all requests, complaints, or other communications received from any individual, government, government agency, regulatory authority, or other entity that is or may have an interest in the Individual Customer Data, data theft or other unauthorized release of Individual Customer Data, disclosure of Individual Customer Data, or misuse of Individual Customer Data to the extent such request, complaint or other communication relates to Data Administrators' processing of such individual's Individual Customer Data.

8. Use of Individual Customer Data

The Data Administrators will only use Individual Customer Data for the primary purposes, as defined in RSA 363:37, which may include 1) providing or billing for electric service, 2) meeting electric system, electric grid, or other operational needs, and 3) researching, developing and implementing new rate structures or demand response, customer assistance, energy management or energy efficiency programs.

II. Conclusion

The Data Protection Plan meets all of the requirements of RSA 363:38, RSA 363:37 and PUC 2004.19.
